

Dialogues from Interstellar to improve the vocabulary in English

1

00:01:14,908 --> 00:01:17,094

WOMAN 1: Well, my dad was a farmer.

2

00:01:18,161 --> 00:01:20,722

Um, like everybody else back then.

3

00:01:22,749 --> 00:01:25,018

Of course, he didn't start that way.

4

00:01:25,502 --> 00:01:27,562

[DISTANT RUMBLING]

5

00:01:30,007 --> 00:01:31,116

[ALARM BEEPING]

6

00:01:31,216 --> 00:01:33,002

MAN [OVER RADIO]:

Computer says you're too tight.

7

00:01:33,102 --> 00:01:35,946

- Nah, I got this.

- Crossing the Straights.

8

00:01:38,265 --> 00:01:40,117

- Shutting it down, Cooper.

- No!

9

00:01:41,518 --> 00:01:44,037

- Shutting it all down.

- No, I need power up!

10

00:01:46,690 --> 00:01:48,041

[COOPER YELLS]

11

00:01:48,275 --> 00:01:49,418

GIRL: Dad?

12

00:01:55,866 --> 00:01:58,602

[PANTING] Sorry, Murph. Go back to bed.

13

00:01:58,702 --> 00:02:01,304

- I thought you were the ghost.

- No.

14

00:02:02,873 --> 00:02:04,942

There are no such things

as ghosts, babe.

15

00:02:05,042 --> 00:02:07,310

Grandpa says you can get ghosts.

16

00:02:08,629 --> 00:02:13,583

Maybe that's because Grandpa's a little
too close to being one himself. Back to bed.

17

00:02:13,717 --> 00:02:15,652

Were you dreaming about the crash?

18

00:02:16,970 --> 00:02:19,364

Get your butt back in bed, Murph. Heh.

19

00:02:46,291 --> 00:02:47,893

WOMAN 1: The wheat had died.

20

00:02:48,627 --> 00:02:51,062

The blight came and we had to burn it.

21

00:02:51,380 --> 00:02:54,658

And we still had corn.

We had acres of corn.

22

00:02:54,758 --> 00:02:57,110

But, uh... mostly we had dust.

23

00:02:59,429 --> 00:03:02,124

WOMAN 2: I guess I can't describe it.

It was just constant.

24

00:03:02,224 --> 00:03:06,203

Just that steady blow of dirt.

25

00:03:08,188 --> 00:03:11,341

WOMAN 3:

We wore, um... little strips of sheet...

26

00:03:11,441 --> 00:03:14,219

sometimes over our nose and mouth...

27

00:03:14,319 --> 00:03:16,922

so that we wouldn't breathe

so much of it.

28

00:03:18,532 --> 00:03:22,211

MAN: Well, when we set the table,

we always set the plate upside-down.

29

00:03:22,311 --> 00:03:25,555

Glasses or cups,

whatever it was upside-down.

30

00:03:30,877 --> 00:03:32,996

Shake a leg! Murph, get a move on!

31

00:03:33,096 --> 00:03:36,825

Tom, 4:00 today, you and me in the barn,

Herbicide Resistance 101.

32

00:03:36,925 --> 00:03:38,527

- Check?

- Yes, sir.

33

00:03:39,970 --> 00:03:41,738

Not at the table, Murph.

34

00:03:42,389 --> 00:03:44,324

Dad, can you fix this?

35

00:03:45,809 --> 00:03:48,445

- COOPER: What the heck did you do to my lander?

- Wasn't me.

36

00:03:48,545 --> 00:03:50,589

Let me guess. It was your ghost?

37

00:03:50,689 --> 00:03:53,091

It knocked it off.

It keeps knocking books off.

38

00:03:53,191 --> 00:03:55,016

- TOM: No such thing as ghosts, dumb-ass.

- Hey.

39

00:03:55,116 --> 00:03:58,372

- I looked it up. It's called a poltergeist.

- Dad, tell her.

40

00:03:58,472 --> 00:04:00,557

Well, it's not very scientific, Murph.

41

00:04:00,657 --> 00:04:03,060

You said science was about admitting
what we don't know.

42

00:04:03,260 --> 00:04:07,097

- She's got you there.

- Hey. Start looking after our stuff.

43

00:04:08,623 --> 00:04:09,933

Coop.

44

00:04:12,027 --> 00:04:14,896

All right, Murph,
you want to talk science?

45

00:04:15,756 --> 00:04:19,076

Don't tell me you're afraid of some ghost.

No, you got to go further.

46

00:04:19,176 --> 00:04:22,012

You got to record the facts, analyze,
get to the how and the why...

47

00:04:22,112 --> 00:04:25,532

then present your conclusions. Deal?

48

00:04:26,099 --> 00:04:27,617

- Deal.

- All right.

49

00:04:30,353 --> 00:04:32,622

- Have a good day at school.

- MAN: Hold up.

50

00:04:32,856 --> 00:04:37,344

Parent-teacher conferences. Parent.

Not grandparent.

51

00:04:37,444 --> 00:04:39,429

[HORN HONKING]

52

00:04:39,529 --> 00:04:41,464

Slow down, turbo!

53

00:04:42,699 --> 00:04:45,994

- That's not a dust storm.

- Nelson's torching his whole crop.

54

00:04:46,094 --> 00:04:47,137

Blight?

55

00:04:47,237 --> 00:04:50,056

MAN: They're saying

it's the last harvest for okra.

56

00:04:50,624 --> 00:04:51,892

Ever.

57

00:04:53,610 --> 00:04:56,405

He should've planted corn

like the rest of us.

58

00:04:56,505 --> 00:04:59,282

Now, be nice to that Miss Hanley.

She's single.

59

00:04:59,382 --> 00:05:00,951

What's that supposed to mean?

60

00:05:01,051 --> 00:05:04,246

Repopulating the earth.

Start pulling your weight, young man.

61

00:05:04,346 --> 00:05:08,408

Why don't you start

minding your own business, old man?

62

00:05:15,607 --> 00:05:17,375

All right, Murph, give me second.

63

00:05:18,902 --> 00:05:20,211

Uh-huh.

64

00:05:20,695 --> 00:05:22,139

Third.

65

00:05:22,239 --> 00:05:23,515

[GEARS GRINDING]

66

00:05:23,615 --> 00:05:25,350

- Find a gear, dumb-ass.

- Grind it!

67

00:05:25,450 --> 00:05:26,593

Shut it, Tom!

68

00:05:27,869 --> 00:05:30,372

- What'd you do, Murph?

- Ah, she didn't do nothing.

69

00:05:30,472 --> 00:05:32,974

- Blew a tire is all.

- Murphy's Law.

70

00:05:33,708 --> 00:05:34,689

Shut up!

71

00:05:34,789 --> 00:05:37,062

- Grab the spare, Tom.

- That is the spare.

72

00:05:39,589 --> 00:05:41,191

COOPER: Get the patch kit!

73

00:05:42,384 --> 00:05:45,662

- TOM: How am I supposed to patch it out here?

- COOPER: You got to figure it out.

74

00:05:45,762 --> 00:05:47,822

I'm not always gonna be here
to help you.

75

00:05:56,147 --> 00:05:57,966

What's going on, Murph?

76

00:05:58,066 --> 00:06:01,344

Why did you and Mom name me
after something that's bad?

77

00:06:01,444 --> 00:06:04,798

- We didn't.

- Murphy's Law?

78

00:06:05,657 --> 00:06:09,811

Murphy's Law doesn't mean
that something bad will happen.

79

00:06:09,911 --> 00:06:13,356

What it means is
whatever can happen will happen.

80

00:06:13,456 --> 00:06:16,101

And that sounded just fine with us.

81

00:06:18,545 --> 00:06:20,113

[WHIRRING]

82

00:06:20,213 --> 00:06:21,856

Whoa!

83

00:06:22,540 --> 00:06:23,733

Get in.

84

00:06:25,010 --> 00:06:26,528

Get in, let's go.

85

00:06:27,762 --> 00:06:29,990

What about the flat tire?

86

00:06:32,851 --> 00:06:34,285

Yeah.

87

00:06:48,158 --> 00:06:52,229

It's an Indian Air Force drone.

Solar cells could power an entire farm.

88

00:06:52,329 --> 00:06:53,888

Take the wheel, Tom.

89

00:06:59,252 --> 00:07:00,687

Go, go, go!

90

00:07:02,172 --> 00:07:03,940

Keep that aimed right at it.

91

00:07:11,965 --> 00:07:14,484

Faster, Tom. I'm losing it.

92

00:07:14,851 --> 00:07:15,994

Right at it.

93

00:07:17,695 --> 00:07:18,938

Stay on it.

94

00:07:20,223 --> 00:07:21,507

Here we go.

95

00:07:24,027 --> 00:07:25,336

Whoa.

96

00:07:30,367 --> 00:07:32,052

Nice one, Tom.

97

00:07:38,516 --> 00:07:39,893

Dad?

98

00:07:40,210 --> 00:07:43,063

I almost got it. Don't stop. Don't stop!

99

00:07:43,421 --> 00:07:46,074

- Dad!

- Tom!

100

00:07:46,174 --> 00:07:48,109

[TIRES SCREECH]

101

00:07:50,553 --> 00:07:52,989

You told me to keep driving.

102

00:07:53,723 --> 00:07:58,286

Well, I guess that answers the old
"If I asked you to drive off a cliff" scenario.

103

00:08:01,398 --> 00:08:04,334

- We lost it.

- No, we didn't.

104

00:08:16,913 --> 00:08:18,681

Want to give it a whirl?

105

00:08:24,587 --> 00:08:26,064

This way.

106

00:08:31,344 --> 00:08:32,529

Go.

107

00:08:33,430 --> 00:08:36,533

Let's lay her down right there
at the edge of the reservoir.

108

00:08:40,729 --> 00:08:42,539

Nicely done.

109

00:08:45,442 --> 00:08:47,385

TOM:

How long you think it's been up there?

110

00:08:47,485 --> 00:08:50,096

COOPER: Delhi Mission Control

went down, same as ours...

111

00:08:50,196 --> 00:08:52,132

- ...ten years ago.

- Heh.

112

00:08:52,365 --> 00:08:54,384

So for ten years?

113

00:08:57,245 --> 00:08:59,940

- Why did it come down so low?

- I don't know.

114

00:09:00,040 --> 00:09:03,026

Maybe the sun cooked its brain
or it was looking for something.

115

00:09:03,126 --> 00:09:05,478

- What?

- Give me a large flatblade.

116

00:09:05,795 --> 00:09:08,565

Maybe some kind of signal? I don't know.

117

00:09:13,820 --> 00:09:15,321

What are you gonna do with it?

118

00:09:16,139 --> 00:09:19,409

I'm gonna give it something
socially responsible to do...

119

00:09:20,185 --> 00:09:21,619

like drive a combine.

120

00:09:22,103 --> 00:09:23,705

Can't we just let it go?

121

00:09:25,899 --> 00:09:27,667

It wasn't hurting anybody.

122

00:09:29,235 --> 00:09:33,631

This thing needs to learn how to adapt,
Murph... like the rest of us.

123

00:09:38,119 --> 00:09:40,231

COOPER: How's this work?

You guys come with?

124

00:09:40,331 --> 00:09:43,833

I've got class. This one needs to wait.

125

00:09:45,376 --> 00:09:48,238

- What did you do?

- They'll tell you about it in there.

126

00:09:48,338 --> 00:09:50,573

- Am I gonna be mad?

- Not with me.

127

00:09:50,673 --> 00:09:53,943

- Just please try not to.

- Hey. Relax.

128

00:09:55,261 --> 00:09:56,696

I got this.

129

00:10:01,050 --> 00:10:03,920

- Little late, Coop.

- Yeah, we had a flat.

130

00:10:04,020 --> 00:10:07,665

And I guess you had to stop off
at the Asian fighter plane store.

131

00:10:07,857 --> 00:10:11,511

No, actually, sir,
that's a surveillance drone.

132

00:10:11,611 --> 00:10:14,464

With outstanding solar cells.
It's Indian.

133

00:10:14,781 --> 00:10:16,216

Take a seat.

134

00:10:17,242 --> 00:10:18,843

So, uh...

135

00:10:19,452 --> 00:10:22,138

we got Tom's scores back.

136

00:10:22,580 --> 00:10:24,607

He's going to make an excellent farmer.

137

00:10:24,707 --> 00:10:28,278

Yeah, he's got a knack for it.

What about college?

138

00:10:28,378 --> 00:10:32,198

The university only takes a handful.

They don't have the resources to...

139

00:10:32,298 --> 00:10:34,659

I still pay my taxes.

140

00:10:34,759 --> 00:10:36,861

Where's that money go?

There's no more armies.

141

00:10:37,262 --> 00:10:39,697

Well, it doesn't go to the university.

142

00:10:40,381 --> 00:10:45,070

- Look, Coop, you have to be realistic.
- You're ruling my son out for college now?

143

00:10:45,311 --> 00:10:48,915

- The kid's 15.
- Tom's score simply isn't high enough.

144

00:10:49,816 --> 00:10:52,085

What's your waistline? About what, 32?

145

00:10:52,402 --> 00:10:56,139

- About a 33 inseam?
- I'm not sure I see what you're getting at.

146

00:10:56,239 --> 00:11:00,760

It takes two numbers to measure your ass
but only one to measure my son's future?

147

00:11:01,536 --> 00:11:04,481

Come on.

You're a well-educated man, Coop.

148

00:11:04,581 --> 00:11:06,641

- And a trained pilot.

- And an engineer.

149

00:11:07,041 --> 00:11:12,155

Okay, well, right now

we don't need more engineers.

150

00:11:12,255 --> 00:11:16,793

We didn't run out of television screens

and planes. We ran out of food.

151

00:11:16,926 --> 00:11:20,413

The world needs farmers.

Good farmers, like you.

152

00:11:20,513 --> 00:11:22,991

- And Tom.

- Uneducated farmers.

153

00:11:23,808 --> 00:11:27,796

We're a caretaker generation, Coop.

And things are getting better.

154

00:11:27,896 --> 00:11:31,124

- Maybe your grandkids will get to be engin...

- Are we done here, sir?

155

00:11:32,317 --> 00:11:33,501

No.

156

00:11:34,235 --> 00:11:36,504

Miss Hanley's here to talk about Murph.

157

00:11:36,738 --> 00:11:39,349

HANLEY: Murph is a great kid.

She's really bright.

158

00:11:39,449 --> 00:11:41,768

But she's been having

a little trouble lately.

159

00:11:41,868 --> 00:11:45,313

She brought this in to show the students.

The section on the lunar landings.

160

00:11:45,413 --> 00:11:50,443

Yeah, it's one of my old textbooks.

She always loved the pictures.

161

00:11:50,543 --> 00:11:54,322

It's an old federal textbook. We've
replaced them with the corrected versions.

162

00:11:54,422 --> 00:11:55,532

Corrected?

163

00:11:55,632 --> 00:12:00,061

Explaining how the Apollo missions
were faked to bankrupt the Soviet Union.

164

00:12:06,476 --> 00:12:08,536

You don't believe we went to the moon?

165

00:12:09,562 --> 00:12:11,631

It was a brilliant piece of propaganda.

166

00:12:11,731 --> 00:12:14,634

The Soviets bankrupted themselves
pouring resources...

167

00:12:14,734 --> 00:12:18,304

- into rockets and other useless machines.

- "Useless machines."

168

00:12:18,404 --> 00:12:22,559

If we don't want a repeat of the excess
and wastefulness of the 20th century, then...

169

00:12:22,659 --> 00:12:26,554

we need to teach our kids about this planet,
not tales of leaving it.

170

00:12:27,288 --> 00:12:31,392

One of those useless machines
they used to make was called an MRI.

171

00:12:31,668 --> 00:12:34,871

If we had any of those left,
the doctors would've been able to find...

172

00:12:34,971 --> 00:12:38,992

the cyst in my wife's brain

before she died instead of afterwards.

173

00:12:39,092 --> 00:12:42,245

Then she'd have been the one
listening to this instead of me...

174

00:12:42,345 --> 00:12:45,731

which would have been a good thing,
because she was always...

175

00:12:46,015 --> 00:12:47,617

the calmer one.

176

00:12:48,184 --> 00:12:50,770

I'm sorry about your wife, Mr. Cooper.

177

00:12:51,521 --> 00:12:55,258

But Murph got into a fistfight
with several of her classmates over this...

178

00:12:55,358 --> 00:12:59,721

Apollo nonsense. So we thought it best
to bring you in and see what ideas...

179

00:12:59,821 --> 00:13:02,590

you might have for dealing
with her behavior on the home front.

180

00:13:03,700 --> 00:13:06,811

Yeah, you know what?
Um, there's a game tomorrow night.

181

00:13:06,911 --> 00:13:09,105

She's going through
a bit of a baseball phase.

182

00:13:09,205 --> 00:13:13,518

Her favorite team is playing.
There's gonna be candy and soda and...

183

00:13:16,504 --> 00:13:18,439

I think I'll take her to that.

184

00:13:21,551 --> 00:13:23,194

[WHISTLING]

185

00:13:23,678 --> 00:13:25,229

How'd it go?

186

00:13:25,847 --> 00:13:27,824

I got you suspended.

187

00:13:28,141 --> 00:13:29,575

- What?

- MAN [OVER RADIO]: Cooper.

188

00:13:31,227 --> 00:13:32,462

This is Cooper. Go.

189

00:13:32,562 --> 00:13:35,465

Coop, those combines you rebuilt
went haywire.

190

00:13:35,565 --> 00:13:37,834

Just reset the controllers.

191

00:13:38,067 --> 00:13:40,795

I did that.

Now you should come take a look.

192

00:14:00,423 --> 00:14:03,593

MAN: One by one they've been
peeling off the fields and heading over.

193

00:14:03,693 --> 00:14:05,528

Something's interfering
with the compass.

194

00:14:06,929 --> 00:14:09,407

Magnetism or some such.

195

00:14:28,117 --> 00:14:29,802

[THUDDING]

196

00:14:52,425 --> 00:14:56,913

MURPH: Nothing special about which book.
I've been working on it, like you said.

197

00:14:57,563 --> 00:15:00,466

- I counted the spaces.

- Why?

198

00:15:02,110 --> 00:15:04,495

In case the ghost
is trying to communicate.

199

00:15:04,987 --> 00:15:06,831

I'm trying Morse.

200

00:15:07,115 --> 00:15:08,599

Morse?

201

00:15:08,699 --> 00:15:10,084

Yeah.

202

00:15:10,201 --> 00:15:12,895

- Dots and dashes, used...
- I know what Morse code is, Murph.

203

00:15:12,995 --> 00:15:16,215

I just don't think your bookshelf's
trying to talk to you.

204

00:15:27,510 --> 00:15:31,989

Had to reset every compass clock and GPS
to offset for the anomaly.

205

00:15:32,181 --> 00:15:34,825

- Which is?

- I don't know.

206

00:15:36,519 --> 00:15:38,713

If the house was built
on magnetic ore...

207

00:15:38,813 --> 00:15:41,999

we'd have seen this the first time
we switched on the tractor.

208

00:15:44,569 --> 00:15:47,838

I hear your meeting at the school
didn't go so well.

209

00:15:48,364 --> 00:15:50,174

Heh. You heard?

210

00:15:51,033 --> 00:15:53,970

It's like we've forgotten
who we are, Donald.

211

00:15:55,538 --> 00:15:59,441

Explorers, pioneers, not caretakers.

212

00:16:00,751 --> 00:16:02,445

When I was a kid...

213

00:16:02,545 --> 00:16:06,774

it felt like they made something new
every day. Some...

214

00:16:07,049 --> 00:16:10,444

gadget or idea.

Like every day was Christmas.

215

00:16:10,803 --> 00:16:15,992

But six billion people...
just try to imagine that.

216

00:16:16,893 --> 00:16:19,996

And every last one of them
trying to have it all.

217

00:16:21,939 --> 00:16:23,174

[SIGHS]

218

00:16:23,274 --> 00:16:25,693

This world isn't so bad.

219

00:16:27,445 --> 00:16:31,289

And Tom will do just fine.

You're the one who doesn't belong.

220

00:16:31,389 --> 00:16:34,402

Born 40 years too late,
or 40 years too early.

221

00:16:35,203 --> 00:16:38,005

My daughter knew it, God bless her.

222

00:16:38,581 --> 00:16:41,475

And your kids know it. Especially Murph.

223

00:16:41,709 --> 00:16:45,196

Well, we used to look up in the sky
and wonder...

224

00:16:45,296 --> 00:16:47,973

at our place in the stars.

225

00:16:50,092 --> 00:16:54,572

Now we just look down and worry
about our place in the dirt.

226

00:16:54,972 --> 00:16:57,908

Cooper, you were good at something...

227

00:16:58,142 --> 00:17:00,745

and you never got a chance
to do anything with it.

228

00:17:01,437 --> 00:17:03,072

I'm sorry.

229

00:17:04,582 --> 00:17:08,711

WOMAN 4: You didn't expect this dirt
that was giving you this food...

230

00:17:08,945 --> 00:17:12,131

to turn on you like that
and destroy you.

231

00:17:12,432 --> 00:17:16,761

In April... I believe I'm right...
Fifteenth of April, I think.

232

00:17:17,119 --> 00:17:21,566

This happened about 1:30 when that thing...
came off the top of that canyon.

233

00:17:21,666 --> 00:17:23,109

[CHEERING]

234

00:17:23,209 --> 00:17:27,530

In my day, we had real ballplayers.
Who are these bums?

235

00:17:27,630 --> 00:17:32,443

COOPER: In my day, people were too busy
fighting over food to even play baseball.

236

00:17:32,635 --> 00:17:37,382

Popcorn at a ballgame is unnatural.
I want a hot dog.

237

00:17:37,482 --> 00:17:40,109

School says you're gonna follow
in my footsteps.

238

00:17:40,560 --> 00:17:42,161

I think that's great.

239

00:17:42,353 --> 00:17:45,748

- You think that's great?
- You hate farming, Dad.

240

00:17:46,440 --> 00:17:48,134

Grandpa said.

241

00:17:48,234 --> 00:17:49,752

COOPER: Grandpa said, huh?

242

00:17:50,069 --> 00:17:52,680

Listen, all that matters
is how you feel about it.

243

00:17:52,780 --> 00:17:54,548

I like what you do.

244

00:17:55,157 --> 00:17:56,759

I like our farm.

245

00:17:57,326 --> 00:17:59,020

You're gonna be great at it.

246

00:17:59,120 --> 00:18:01,097

[ALL CHEERING]

247

00:18:08,004 --> 00:18:10,272

[SIREN WAILING IN DISTANCE]

248

00:18:11,999 --> 00:18:13,801

Let's get out of here.

249

00:18:20,558 --> 00:18:22,660

COOPER: All right, it's a doozy.

250

00:18:23,269 --> 00:18:25,204

All right, gang, let's mask up.

251

00:18:28,441 --> 00:18:30,543

- Tom? Murph? Check?

- TOM: Yeah.

252

00:19:23,996 --> 00:19:26,682

Murph, Tom, you guys shut your windows?

253

00:19:31,003 --> 00:19:32,188

Murph?

254

00:19:53,484 --> 00:19:54,877

MURPH: The ghost.

255

00:19:56,028 --> 00:19:57,755

Grab your pillow.

256

00:19:58,047 --> 00:20:00,382

You're sleeping in with Tom.

257

00:20:55,112 --> 00:20:56,981

COOPER: It's not a ghost.

258

00:21:01,903 --> 00:21:03,821

It's gravity.

259

00:21:05,473 --> 00:21:07,825

DONALD:

I'm dropping Tom, then heading to town.

260

00:21:08,017 --> 00:21:12,288

You want to clean that up
when you've finished praying to it?

261

00:21:37,546 --> 00:21:39,899

It's not Morse, Murph. It's binary.

262

00:21:40,299 --> 00:21:42,459

Thick is one, thin is zero.

263

00:21:46,722 --> 00:21:48,157

Coordinates.

264

00:21:50,643 --> 00:21:53,245

Nope. Mm-mm.

265

00:21:54,605 --> 00:21:55,873

Here we go.

266

00:21:57,358 --> 00:21:58,834

Thirty-three.

267

00:22:01,695 --> 00:22:02,838

That's it.

268

00:22:04,198 --> 00:22:05,799

I can't miss this!

269

00:22:06,033 --> 00:22:09,303

Grandpa will be back

in a couple hours, Murph.

270

00:22:09,995 --> 00:22:12,765

But you don't know

what you're gonna find.

271

00:22:13,666 --> 00:22:15,300

And that...

272

00:22:16,085 --> 00:22:18,270

is why I can't take you.

273

00:22:24,260 --> 00:22:25,486

Murph?

274

00:22:27,471 --> 00:22:31,075

Grandpa will be home in a while.

Tell him I'll call him on the radio.

275

00:22:37,147 --> 00:22:38,499

- Aah!

- Jesus.

276

00:22:39,400 --> 00:22:41,385

- What are you doing?

- Heh-heh.

277

00:22:41,485 --> 00:22:43,712

Oh, you think this is funny? Huh?

278

00:22:43,946 --> 00:22:46,382

You wouldn't be here

if it wasn't for me.

279

00:22:48,117 --> 00:22:50,219

Make yourself useful.

280

00:23:53,474 --> 00:23:55,208

[SOFTLY] Hey, Murph?

281

00:23:56,435 --> 00:23:57,978

Murph.

282

00:24:00,981 --> 00:24:03,417

I think this is the end of the road.

283

00:24:06,320 --> 00:24:08,464

Didn't you bring the bolt cutters?

284

00:24:09,531 --> 00:24:10,883

That's my girl.

285

00:24:38,519 --> 00:24:39,837

MAN'S VOICE: Step away!

286

00:24:39,937 --> 00:24:43,090

COOPER: Don't shoot! I'm not armed.

My daughter's in the car.

287

00:24:43,190 --> 00:24:44,750

[CRACKLING]

288

00:24:46,819 --> 00:24:48,470

[FOOTSTEPS]

289

00:24:48,570 --> 00:24:50,923

- MAN'S VOICE: Don't be afraid.

- Aah!

290

00:25:03,544 --> 00:25:05,729

MAN'S VOICE:

How did you find this place?

291

00:25:06,338 --> 00:25:07,773

Where's my daughter?

292

00:25:07,965 --> 00:25:11,952

You had the coordinates for this facility
marked on your map. Where did you get them?

293

00:25:12,052 --> 00:25:13,254

Where's my daughter?

294

00:25:13,354 --> 00:25:16,573

Don't make me take you down again.
Sit down!

295

00:25:16,807 --> 00:25:19,084

COOPER: Oh, you still think
you're a Marine, pal?

296

00:25:19,184 --> 00:25:21,870

Marines don't exist anymore.

297

00:25:22,062 --> 00:25:27,092

- And I got grunts like you mowing my grass.

- Where did you find those coordinates?

298

00:25:27,192 --> 00:25:29,845

But you don't look much

like a lawnmower.

299

00:25:29,945 --> 00:25:32,848

Think I'll turn you

into an overqualified vacuum cleaner.

300

00:25:32,948 --> 00:25:34,258

WOMAN: No, you won't.

301

00:25:35,784 --> 00:25:37,803

TARS, back down, please.

302

00:25:39,204 --> 00:25:42,432

You know, you're taking a risk
using ex-military security.

303

00:25:42,791 --> 00:25:46,695

They're old, and their control units
are unpredictable.

304

00:25:46,795 --> 00:25:48,864

It's what the government could spare.

305

00:25:48,964 --> 00:25:50,366

[PANTING]

306

00:25:50,466 --> 00:25:51,733

Who are you?

307

00:25:52,092 --> 00:25:53,494

Dr. Brand.

308

00:25:53,594 --> 00:25:56,071

I knew a Dr. Brand once.

He was a professor.

309

00:25:56,346 --> 00:25:57,948

What makes you think I'm not?

310

00:25:58,307 --> 00:26:00,876

Wasn't near as cute, either.

311

00:26:00,976 --> 00:26:03,579

Please, Dr. Brand.

I don't have any idea what this is.

312

00:26:04,313 --> 00:26:06,882

Now I'm scared for my daughter
and want her by my side.

313

00:26:06,982 --> 00:26:09,543

You give me that,
I'll tell you anything you want to know.

314

00:26:12,821 --> 00:26:15,924

Get the principals and the girl
in the conference room, please.

315

00:26:17,359 --> 00:26:20,137

Your daughter is fine. Bright kid.

316

00:26:20,621 --> 00:26:22,523

Must have a very smart mother.

317

00:26:22,623 --> 00:26:25,109

It's pretty clear

you don't want any visitors.

318

00:26:25,209 --> 00:26:29,271

So why don't you just let us back up from
your fence and we'll be on our way? Huh?

319

00:26:29,463 --> 00:26:32,107

- It's not that simple.

- Well, sure, it is.

320

00:26:32,341 --> 00:26:36,111

I don't know anything about you.

I don't know anything about this place.

321

00:26:36,887 --> 00:26:38,155

Yes, you do.

322

00:26:43,769 --> 00:26:44,953

Dad!

323

00:26:47,523 --> 00:26:48,665

Hello, Cooper.

324

00:26:50,025 --> 00:26:51,168

Professor Brand.

325

00:26:52,536 --> 00:26:55,264

MAN: Explain to me

how you found this facility.

326

00:26:55,364 --> 00:26:58,726

Kind of an accident. We sort of stumbled
upon it. We were on a salvage run...

327

00:26:58,826 --> 00:27:01,603

You're sitting in the best-kept secret
in the world.

328

00:27:01,703 --> 00:27:05,307

Nobody stumbles in here.

Nobody stumbles out.

329

00:27:05,541 --> 00:27:09,820

BRAND: Cooper, please.

Cooperate with these people.

330

00:27:09,920 --> 00:27:11,230

Look.

331

00:27:12,047 --> 00:27:13,815

It's kind of hard to explain.

332

00:27:14,049 --> 00:27:18,871

We learned these coordinates
from an anomaly.

333

00:27:18,971 --> 00:27:20,372

What sort of anomaly?

334

00:27:20,472 --> 00:27:23,834

I hesitate to term it supernatural,
but it definitely wasn't scientific.

335

00:27:23,934 --> 00:27:27,921

You're going to have to be specific,
Mr. Cooper. Right now.

336

00:27:28,021 --> 00:27:29,373

It was gravity.

337

00:27:34,247 --> 00:27:37,222

Um, what sort of gravitational anomaly?
Where was this?

338

00:27:37,322 --> 00:27:40,684

Now, I'm real happy that you're excited
about gravity, bud...

339

00:27:40,784 --> 00:27:43,663

but you're not getting any answers
from us until I get assurances.

340

00:27:43,763 --> 00:27:45,555

- Assurances?

- COOPER: Yeah.

341

00:27:46,290 --> 00:27:49,818

Like, that we're getting out of here.

And I don't mean in the trunk of some car.

342

00:27:49,918 --> 00:27:51,687

[ALL LAUGH]

343

00:27:52,296 --> 00:27:55,908

- Don't you know who we are, Coop?

- No, professor, I don't.

344

00:27:56,008 --> 00:27:58,110

WOMAN:

You know my father, Professor Brand.

345

00:27:58,635 --> 00:28:00,028

We're NASA.

346

00:28:01,722 --> 00:28:04,032

- NASA?

- BRAND: NASA.

347

00:28:04,266 --> 00:28:06,159

The same NASA you flew for.

348

00:28:17,112 --> 00:28:18,847

COOPER:

I heard they shut you down, sir...

349

00:28:18,947 --> 00:28:23,018

for refusing to drop bombs

from the stratosphere onto starving people.

350

00:28:23,118 --> 00:28:25,521

When they realized

that killing other people was...

351

00:28:25,621 --> 00:28:28,524

not a long-term solution,

then they needed us back.

352

00:28:28,624 --> 00:28:30,692

- In secret.

- Why secret?

353

00:28:30,792 --> 00:28:34,788

BRAND: Because public opinion

wouldn't allow spending on space exploration.

354

00:28:34,888 --> 00:28:37,482

Not while you're struggling

to put food on the table.

355

00:28:38,800 --> 00:28:40,068

Blight.

356

00:28:40,427 --> 00:28:44,664

Wheat seven years ago. Okra this year.

357

00:28:45,015 --> 00:28:46,783

Now there's just corn.

358

00:28:47,017 --> 00:28:49,044

And we're growing more

than we ever have.

359

00:28:49,144 --> 00:28:53,415

But like the potatoes in Ireland
and the wheat in the Dust Bowl...

360

00:28:53,899 --> 00:28:56,501

the corn will die.

361

00:28:57,152 --> 00:28:58,295

Soon.

362

00:29:02,199 --> 00:29:03,392

[COOPER SIGHS]

363

00:29:03,492 --> 00:29:07,179

We'll find a way, professor.

We always have.

364

00:29:07,829 --> 00:29:11,933

Driven by the unshakable faith
the Earth is ours.

365

00:29:12,334 --> 00:29:16,438

Not just ours, no. But it is our home.

366

00:29:17,673 --> 00:29:22,953

Earth's atmosphere is 80 percent nitrogen.

We don't even breathe nitrogen.

367

00:29:23,053 --> 00:29:28,458

Blight does. And as it thrives,
our air gets less and less oxygen.

368

00:29:28,558 --> 00:29:32,087

The last people to starve
will be the first to suffocate.

369

00:29:32,187 --> 00:29:34,456

And your daughter's generation...

370

00:29:35,924 --> 00:29:38,343

will be the last to survive on Earth.

371

00:29:38,443 --> 00:29:42,130

WOMAN: Murph is feeling tired. I was wondering

if she could take a nap in my office.

372

00:29:42,531 --> 00:29:44,132

Yeah. Thank you.

373

00:29:46,827 --> 00:29:48,269

Alright...

374

00:29:48,870 --> 00:29:52,474

now you need to tell me

what your plan is to save the world.

375

00:29:53,041 --> 00:29:56,645

We're not meant to save the world.

We're meant to leave it.

376

00:30:02,384 --> 00:30:03,527

COOPER: Rangers.

377

00:30:03,719 --> 00:30:08,782

The last components of our one versatile ship
in orbit, the Endurance.

378

00:30:08,974 --> 00:30:10,700

Our final expedition.

379

00:30:11,393 --> 00:30:14,454

You sent people out there
looking for a new home?

380

00:30:14,980 --> 00:30:16,373

The Lazarus missions.

381

00:30:16,606 --> 00:30:19,668

- Oh, that sounds cheerful.
- Lazarus came back from the dead.

382

00:30:19,901 --> 00:30:22,003

Sure, but he had to die
in the first place.

383

00:30:22,529 --> 00:30:25,307

There's not a planet in our solar system
that could sustain life...

384

00:30:25,407 --> 00:30:27,976

and the nearest star's
over a thousand years away.

385

00:30:28,076 --> 00:30:30,846

That doesn't even qualify as futile.

386

00:30:32,414 --> 00:30:33,849

Where'd you send them?

387

00:30:34,166 --> 00:30:35,651

Cooper...

388

00:30:35,751 --> 00:30:40,614

I can't tell you anymore
unless you agree to pilot this craft.

389

00:30:40,714 --> 00:30:44,109

- You're the best pilot we ever had.
- I barely left the stratosphere.

390

00:30:44,301 --> 00:30:46,528

This team never left the simulator.

391

00:30:46,762 --> 00:30:50,624

We need a pilot, and this is the mission
that you were trained for.

392

00:30:50,724 --> 00:30:52,325

Without even knowing it?

393

00:30:53,268 --> 00:30:57,589

An hour ago, you didn't even know
I was alive. You were going anyway.

394

00:30:57,689 --> 00:31:01,418

We had no choice.

But something sent you here.

395

00:31:01,651 --> 00:31:04,463

- They chose you.

- Who's "they"?

396

00:31:12,329 --> 00:31:14,347

How long would I be gone?

397

00:31:14,831 --> 00:31:18,051

Hard to know. Years?

398

00:31:18,460 --> 00:31:22,731

- I've got kids, professor.

- Get out there and save them.

399

00:31:26,009 --> 00:31:27,452

Who's "they"?

400

00:31:27,552 --> 00:31:31,581

We started detecting gravitational
anomalies almost 50 years ago.

401

00:31:31,681 --> 00:31:35,377

Mostly small distortions to our instruments
in the upper atmosphere.

402

00:31:35,477 --> 00:31:38,705

In fact, I believe
you encountered one yourself.

403

00:31:39,272 --> 00:31:41,774

Yeah, over the Straights.

404

00:31:42,275 --> 00:31:45,387

My crash.

Something tripped my fly-by-wire.

405

00:31:45,487 --> 00:31:46,796

Exactly.

406

00:31:47,531 --> 00:31:52,519

But of all these anomalies,
the most significant is this:

407

00:31:52,619 --> 00:31:54,688

Out near Saturn...

408

00:31:54,788 --> 00:31:56,973

a disturbance of space-time.

409

00:31:59,000 --> 00:32:02,229

- Is that a Wormhole?

- It appeared 48 years ago.

410

00:32:02,587 --> 00:32:06,775

- And it leads where?

- Another galaxy.

411

00:32:08,427 --> 00:32:10,746

A wormhole's not
a naturally occurring phenomenon.

412

00:32:10,846 --> 00:32:12,364

Someone placed it there.

413

00:32:13,056 --> 00:32:14,658

- "They"?

- Mm.

414

00:32:15,058 --> 00:32:19,246

And whoever they are,
they appear to be looking out for us.

415

00:32:19,604 --> 00:32:24,343

That Wormhole lets us travel to other stars.
It came along right as we needed it.

416

00:32:24,443 --> 00:32:27,429

They've put potentially habitable worlds
right within our reach.

417

00:32:27,529 --> 00:32:29,514

Twelve, in fact,
from our initial probes.

418

00:32:29,614 --> 00:32:32,059

- You sent probes into that?

- Mm-hm.

419

00:32:32,159 --> 00:32:35,562

We sent people into it. Ten years ago.

420

00:32:36,496 --> 00:32:38,398

The Lazarus missions.

421

00:32:38,498 --> 00:32:42,310

BRAND: Twelve possible worlds,
twelve Ranger launches carrying...

422

00:32:42,669 --> 00:32:48,183

the bravest humans ever to live...

led by the remarkable Dr. Mann.

423

00:32:48,283 --> 00:32:51,453

Each person's landing pod

had enough life support for two years.

424

00:32:51,553 --> 00:32:53,580

But they could use hibernation

to stretch that...

425

00:32:53,680 --> 00:32:56,958

making observations on organics

over a decade or more.

426

00:32:57,058 --> 00:33:00,996

Their mission was to assess their world,

and if it showed potential...

427

00:33:01,229 --> 00:33:05,717

then they could send out a signal,

bed down for the long nap, wait to be rescued.

428

00:33:05,817 --> 00:33:07,961

And what if the world
didn't show promise?

429

00:33:08,487 --> 00:33:10,005

Hence the bravery.

430

00:33:10,697 --> 00:33:13,308

You don't have the resources
to visit all 12.

431

00:33:13,408 --> 00:33:14,834

No.

432

00:33:15,410 --> 00:33:18,271

Data transmission back through
the Wormhole is rudimentary.

433

00:33:18,371 --> 00:33:23,485

Simple binary pings on an annual basis give us
some clue as to which worlds have potential.

434

00:33:23,585 --> 00:33:25,478

And one system shows promise.

435

00:33:25,712 --> 00:33:28,656

One. That's a bit

of a long shot, isn't it?

436

00:33:29,090 --> 00:33:32,027

One system with three potential worlds?

437

00:33:32,344 --> 00:33:34,329

No long shot.

438

00:33:36,097 --> 00:33:37,324

Okay.

439

00:33:37,933 --> 00:33:40,568

So if we find a home...

440

00:33:42,938 --> 00:33:46,499

- ...then what?

- That's the long shot.

441

00:33:46,733 --> 00:33:50,045

There's a Plan A and a Plan B.

442

00:33:50,445 --> 00:33:53,506

Did you notice anything strange
about the launch chamber?

443

00:34:05,126 --> 00:34:08,146

COOPER:

This entire facility's a centrifuge.

444

00:34:08,380 --> 00:34:10,982

Some kind of vehicle. A space station?

445

00:34:11,216 --> 00:34:15,287

- BRAND: Both. Plan A.

- How do you get it off the ground?

446

00:34:15,387 --> 00:34:19,291

The first gravitational anomalies
changed everything.

447

00:34:19,391 --> 00:34:23,928

Suddenly we knew
that harnessing gravity was real.

448

00:34:24,062 --> 00:34:28,833

So I started working on a theory
and we started building this station.

449

00:34:29,109 --> 00:34:31,494

But you haven't solved it yet.

450

00:34:32,279 --> 00:34:33,922

That's why there's Plan B.

451

00:34:34,322 --> 00:34:39,102

The problem is gravity. How to get
a viable amount of human life off the planet.

452

00:34:39,202 --> 00:34:40,595

This is one way.

453

00:34:40,829 --> 00:34:43,431

Plan B: A population bomb.

454

00:34:43,665 --> 00:34:48,520

Over 5,000 fertilized eggs

weighing in at just under 900 kilos.

455

00:34:49,129 --> 00:34:50,697

How would you raise them?

456

00:34:50,797 --> 00:34:53,325

With equipment on board,

we incubate the first 10.

457

00:34:53,425 --> 00:34:57,404

After that, with surrogacy,

the growth becomes exponential.

458

00:34:58,013 --> 00:35:01,374

Within 30 years,

we could have a colony of hundreds.

459

00:35:01,474 --> 00:35:04,953

The real difficulty with colonization

is genetic diversity.

460

00:35:05,478 --> 00:35:07,088

This takes care of that.

461

00:35:07,188 --> 00:35:09,749

But what about the people here?

You just...

462

00:35:10,025 --> 00:35:13,536

You give up on them? My kids?

463

00:35:13,778 --> 00:35:17,215

That's why Plan A is a lot more fun.

464

00:35:19,367 --> 00:35:22,312

- How far have you got?

- Almost there.

465

00:35:22,412 --> 00:35:24,931

You're asking me to hang everything...

466

00:35:25,874 --> 00:35:27,308

on an almost.

467

00:35:27,751 --> 00:35:30,145

I'm asking you to trust me.

468

00:35:31,755 --> 00:35:33,031

[SIGHS]

469

00:35:33,131 --> 00:35:34,899

Find us a new home.

470

00:35:35,550 --> 00:35:37,652

And by the time you return...

471

00:35:38,136 --> 00:35:40,905

I will have solved
the problem of gravity.

472

00:35:41,765 --> 00:35:43,450

I give you my word.

473

00:35:55,987 --> 00:35:57,589

MURPH: Go away!

474

00:36:08,166 --> 00:36:09,484

Murph.

475

00:36:09,584 --> 00:36:12,687

MURPH: Go! If you're leaving, just go.

476

00:36:15,382 --> 00:36:18,418

DONALD: This world was never enough
for you, was it, Coop?

477

00:36:19,052 --> 00:36:23,306

What, because heading out there
is what I feel like I was born to do?

478

00:36:23,765 --> 00:36:25,700

And it excites me? Heh.

479

00:36:26,309 --> 00:36:28,837

No, that does not make it wrong.

480

00:36:28,937 --> 00:36:33,666

It might. Don't trust the right thing
done for the wrong reason.

481

00:36:34,317 --> 00:36:36,720

The why of the thing,
that's the foundation.

482

00:36:36,820 --> 00:36:39,205

And the foundation's solid.

483

00:36:42,075 --> 00:36:47,180

We farmers, we sit here every year
when the rains fail and we say:

484

00:36:47,372 --> 00:36:48,723

"Next year."

485

00:36:49,290 --> 00:36:53,061

Well, next year ain't gonna save us,
nor the one after that.

486

00:36:53,295 --> 00:36:58,024

This world's a treasure, Donald,
but it's been telling us to leave for a while now.

487

00:37:02,637 --> 00:37:06,533

Mankind was born on Earth,
it was never meant to die here.

488

00:37:09,561 --> 00:37:12,839

Tom will be all right, but you got
to make things right with Murph.

489

00:37:12,939 --> 00:37:14,582

I will.

490

00:37:14,941 --> 00:37:18,211

Without making promises
you don't know you can keep.

491

00:37:28,747 --> 00:37:30,849

You have to talk to me, Murph.

492

00:37:33,251 --> 00:37:35,445

I need to fix this before I go.

493

00:37:35,545 --> 00:37:38,523

MURPH: Then I'll keep it broken
so you have to stay.

494

00:37:40,008 --> 00:37:45,113

After you kids came along, your mom said
something to me I never quite understood.

495

00:37:45,388 --> 00:37:47,515

She said, "Now...

496

00:37:48,892 --> 00:37:53,496

we're just here
to be memories for our kids."

497

00:37:58,526 --> 00:38:01,129

And I think that now I understand
what she meant.

498

00:38:04,783 --> 00:38:08,636

Once you're a parent,

you're the ghost of your children's future.

499

00:38:10,163 --> 00:38:12,432

You said ghosts didn't exist.

500

00:38:18,797 --> 00:38:20,398

That's right, Murph.

501

00:38:23,510 --> 00:38:25,344

Murph, look at me.

502

00:38:27,889 --> 00:38:30,491

I can't be your ghost right now.

503

00:38:32,185 --> 00:38:34,487

I need to exist.

504

00:38:35,814 --> 00:38:37,832

They chose me.

505

00:38:38,441 --> 00:38:42,503

Murph, they chose me. You saw.

You're the one who led me to them.

506

00:38:45,031 --> 00:38:47,634

That's exactly why you can't go.

507

00:38:50,745 --> 00:38:52,805

I figured out the message.

508

00:38:53,122 --> 00:38:56,401

- One word. Know what it is?

- Murph.

509

00:38:56,501 --> 00:38:57,936

"Stay."

510

00:38:58,211 --> 00:39:01,189

- It says, "Stay," Dad.

- Murph.

511

00:39:02,048 --> 00:39:03,575

You don't believe me.

512

00:39:03,675 --> 00:39:06,536

Look at the books! Look at this.

It says, "Stay."

513

00:39:06,636 --> 00:39:09,697

Why...? You're not listening!

It says, "Stay!"

514

00:39:09,931 --> 00:39:13,668

- No, I'm coming back.

- When?

515

00:39:26,281 --> 00:39:29,017

One for you, one for me.

516

00:39:29,117 --> 00:39:32,387

When I'm up there in hypersleep, or...

517

00:39:32,620 --> 00:39:35,964

traveling near the speed of light, or...

518

00:39:36,165 --> 00:39:38,651

near a black hole...

519

00:39:38,751 --> 00:39:43,598

time's gonna change for me.

It's gonna run more slowly.

520

00:39:44,883 --> 00:39:47,276

When we get back...

521

00:39:47,802 --> 00:39:49,287

we're gonna compare.

522

00:39:49,387 --> 00:39:52,315

- MURPH: Time will run differently for us?

- Yeah.

523

00:39:53,099 --> 00:39:57,870

By the time I get back,

we might even be the same age, you and me.

524

00:39:58,146 --> 00:40:01,481

"What?" Imagine that!

525

00:40:05,028 --> 00:40:06,262

Aw, Murph...

526

00:40:06,362 --> 00:40:09,390

You have no idea when you're coming back.

527

00:40:10,783 --> 00:40:12,929

No idea at all!

528

00:40:15,413 --> 00:40:17,607

Murph, don't...

Don't make me leave like this.

529

00:40:17,707 --> 00:40:19,308

Come on, Murph!

530

00:40:19,709 --> 00:40:22,445

Don't make me leave like this, Murph!

531

00:40:29,636 --> 00:40:30,778

Hey...

532

00:40:31,220 --> 00:40:35,208

I love you. Forever. You hear me?

533

00:40:35,308 --> 00:40:38,819

I love you forever, and I'm coming back.

534

00:40:44,317 --> 00:40:45,952

I'm coming back.

535

00:41:03,878 --> 00:41:06,447

- How'd it go?

- Fine.

536

00:41:06,798 --> 00:41:08,357

Just fine.

537

00:41:14,722 --> 00:41:15,948

I love you, Tom.

538

00:41:16,391 --> 00:41:18,585

- Travel safe, huh?

- Yeah.

539

00:41:18,685 --> 00:41:21,004

You look after our place
for me, all right?

540

00:41:21,104 --> 00:41:22,830

- All right?

- Uh-huh.

541

00:41:27,435 --> 00:41:31,113

- Hey, can I use your truck while you're gone?

- You mean your truck?

542

00:41:32,115 --> 00:41:34,041

I'll make sure they bring it back.

543

00:41:35,868 --> 00:41:37,962

Look after my kids, Donald!

544

00:41:50,133 --> 00:41:53,861

TARS:

Go for main engine start. T-minus 10...

545

00:41:54,829 --> 00:41:56,581

- Dad!

- ...nine...

546

00:41:56,681 --> 00:41:58,032

Dad!

547

00:41:58,758 --> 00:42:00,402

...eight...

548

00:42:01,135 --> 00:42:03,738

- seven...

- Dad!

549

00:42:03,971 --> 00:42:05,314

...six...

550

00:42:06,490 --> 00:42:09,210

five, main engine start, four...

551

00:42:10,645 --> 00:42:11,912

three...

552

00:42:12,480 --> 00:42:13,706

two...

553

00:42:14,523 --> 00:42:16,709

one. Booster ignition and...

554

00:42:25,877 --> 00:42:28,437

All engines look good.

Beginning roll program.

555

00:42:32,633 --> 00:42:35,570

Prepare for stage one separation.

556

00:42:35,803 --> 00:42:36,946

Stage one.

557

00:42:42,810 --> 00:42:44,745

There is Mach 1.

558

00:42:45,605 --> 00:42:49,417

Everybody good?

Plenty of slaves for my robot colony?

559

00:42:51,194 --> 00:42:54,589

They gave him a humor setting
so he'd fit in better with his unit.

560

00:42:54,822 --> 00:42:56,557

He thinks it relaxes us.

561

00:42:56,657 --> 00:42:59,552

A giant sarcastic robot.

562

00:43:00,328 --> 00:43:01,813

What a great idea!

563

00:43:01,913 --> 00:43:04,691

TARS: I have a cue light I can use
when I'm joking if you like.

564

00:43:04,791 --> 00:43:05,900

That'd probably help.

565

00:43:06,000 --> 00:43:10,021

You can use it to find your way back
to the ship after I blow you out the airlock.

566

00:43:11,005 --> 00:43:14,075

- What's your humor setting, TARS?

- That's 100 percent.

567

00:43:14,175 --> 00:43:16,068

Let's bring it on down to 75, please.

568

00:43:16,302 --> 00:43:18,237

TARS: Stage two separation.

569

00:43:28,815 --> 00:43:31,175

COOPER: All feeds going manual.

570

00:43:31,275 --> 00:43:33,193

MAN: Going manual.

571

00:43:34,987 --> 00:43:37,223

COOPER: Deactivate probe heater one,
two and three.

572

00:43:37,323 --> 00:43:38,466

MAN: Check.

573

00:43:43,955 --> 00:43:46,974

- Taking control.

- TARS: This is handover to you.

574

00:43:50,711 --> 00:43:53,105

- MAN: A.D.F. check.

- COOPER: Over.

575

00:43:53,339 --> 00:43:57,076

Pull thrusters back.

Fuel cells one, two, three.

576

00:43:57,176 --> 00:44:00,613

- MAN: One hundred percent.

- COOPER: Ex-mites.

577

00:44:09,480 --> 00:44:14,293

It's hard leaving everything.

My kids. Your father.

578

00:44:14,819 --> 00:44:17,263

We're going to be spending
a lot of time together.

579

00:44:17,363 --> 00:44:20,508

- We should learn to talk.
- And when not to.

580

00:44:22,702 --> 00:44:24,312

Just being honest.

581

00:44:24,412 --> 00:44:26,847

I don't think you need to be that honest.

582

00:44:27,165 --> 00:44:29,650

Hey, TARS, what's your honesty parameter?

583

00:44:29,750 --> 00:44:32,445

- TARS: Ninety percent.
- Ninety percent?

584

00:44:32,545 --> 00:44:35,243

Absolute honesty isn't always
the most diplomatic,

585

00:44:35,343 --> 00:44:38,409

nor the safest form of communication
with emotional beings.

586

00:44:38,509 --> 00:44:40,069

Okay.

587

00:44:40,428 --> 00:44:43,155

Ninety percent it is, Dr. Brand.

588

00:44:46,767 --> 00:44:50,079

We are coming up on the Endurance.

Twelve minutes out.

589

00:45:07,079 --> 00:45:09,181

Okay. Taking control.

590

00:45:12,543 --> 00:45:15,521

Approaching module port, 500 meters.

591

00:45:28,434 --> 00:45:29,660

It's all you, Doyle.

592

00:45:48,120 --> 00:45:50,681

Nice and easy, Doyle. Nice and easy.

593

00:45:55,753 --> 00:45:58,406

- I feel good.

- Take us home.

594

00:45:58,506 --> 00:46:00,274

[BEEPING]

595

00:46:06,138 --> 00:46:08,441

- Lock.

- Target locked.

596

00:46:08,541 --> 00:46:10,543

- COOPER: Well done.

- Okay, helmets on.

597

00:46:10,643 --> 00:46:11,786

Good job.

598

00:46:45,136 --> 00:46:48,656

Door's not charging. Never mind.

599

00:47:11,329 --> 00:47:13,139

Cooper, you should have control.

600

00:47:13,372 --> 00:47:14,974

Control here.

601

00:47:16,292 --> 00:47:19,019

Communication with ring module active.

602

00:47:25,384 --> 00:47:27,027

WOMAN: Oh, wow.

603

00:47:32,725 --> 00:47:33,993

TARS: That's initiate.

604

00:47:41,442 --> 00:47:44,044

- COOPER: Are we ready to spin?

- Just a sec.

605

00:47:55,373 --> 00:47:57,808

- Hello, CASE.

- Hello, TARS.

606

00:47:58,667 --> 00:48:00,686

All right, we're all set.

607

00:48:01,045 --> 00:48:02,646

All right, let's do it.

608

00:48:20,856 --> 00:48:22,458

Heh.

609

00:48:31,700 --> 00:48:33,093

COOPER: Thirty percent of spin.

610

00:48:39,917 --> 00:48:41,352

One G.

611

00:48:42,002 --> 00:48:44,104

How's gravity treating you back there?

612

00:48:44,338 --> 00:48:46,006

Well.

613

00:48:48,676 --> 00:48:50,536

Romilly? Hey, you okay?

614

00:48:50,636 --> 00:48:51,746

- Yeah.

- You all right?

615

00:48:51,846 --> 00:48:54,031

Mm. Yeah, I just need a minute.

616

00:48:54,348 --> 00:48:57,640

I think we have some Dramamine
in the hab pod, I'm just gonna get that

617

00:48:57,740 --> 00:48:59,600

or maybe in the cryo-beds.

I'll just be a sec.

618

00:48:59,700 --> 00:49:01,455

- Hey, Brand?

- Yeah?

619

00:49:01,689 --> 00:49:03,316

- Bring a lot.

- Heh-heh-heh.

620

00:49:11,991 --> 00:49:14,969

Amelia, be safe.

621

00:49:15,202 --> 00:49:18,773

- Give my regards to Dr. Mann.

- I will, Dad.

622

00:49:18,873 --> 00:49:24,395

It looks good for your trajectory.

We've calculated two years to Saturn.

623

00:49:24,845 --> 00:49:26,647

That's a lot of Dramamine.

624

00:49:27,256 --> 00:49:29,817

Look after my family,
will you, please, sir?

625

00:49:30,259 --> 00:49:33,353

We'll be waiting for you
when you get back.

626

00:49:33,554 --> 00:49:37,491

A little older, a little wiser,
but happy to see you.

627

00:49:40,227 --> 00:49:43,664

BRAND:

Do not go gentle into that good night

628

00:49:44,031 --> 00:49:48,377

Old age should burn
and rave at close of day

629

00:49:49,445 --> 00:49:54,508

Rage, rage against
the dying of the light

630

00:49:55,284 --> 00:49:59,179

Though wise men at their end

Know dark is right

631

00:49:59,413 --> 00:50:02,391

Because their words had forked

No lightning they

632

00:50:02,708 --> 00:50:06,353

Do not go gentle into that good night

633

00:50:06,921 --> 00:50:11,558

Rage, rage against

the dying of the light

634

00:50:27,858 --> 00:50:29,627

- DOYLE: You good?

- ROMILLY: Yeah.

635

00:50:30,444 --> 00:50:32,046

Okay, thank you, sir.

636

00:50:35,449 --> 00:50:37,084

Here. Pills.

637

00:50:39,537 --> 00:50:41,255

So alone.

638

00:50:41,455 --> 00:50:43,482

We have each other.

Dr. Mann had it worse.

639

00:50:43,582 --> 00:50:45,025

No, I mean them.

640

00:50:45,125 --> 00:50:46,318

Hm?

641

00:50:46,418 --> 00:50:49,813

COOPER: It's a perfect planet,
and we won't find another one like her.

642

00:50:50,297 --> 00:50:53,651

No, it's not like looking
for a new condo.

643

00:50:54,677 --> 00:50:56,945

The human race is going to be...

644

00:50:57,146 --> 00:50:58,456

adrift...

645

00:50:58,556 --> 00:51:02,159

desperate for a rock it can cling to
while it catches its breath.

646

00:51:02,643 --> 00:51:04,578

We need to find that rock.

647

00:51:04,812 --> 00:51:09,667

And our three prospects are at the edge
of what might sustain human life.

648

00:51:10,067 --> 00:51:12,595

Laura Miller's planet is first.

649

00:51:12,695 --> 00:51:14,922

- Laura started our biology program.

- COOPER: Mm-hm.

650

00:51:19,827 --> 00:51:23,097

- AMELIA: Uh, Wolf Edmunds is here.

- Tell me about Edmunds.

651

00:51:23,831 --> 00:51:26,884

Oh, uh... Wolf's a particle physicist.

652

00:51:28,877 --> 00:51:31,313

None of them had families, huh?

653

00:51:32,256 --> 00:51:35,201

No. No attachments. My father insisted.

654

00:51:35,301 --> 00:51:38,913

They all knew the odds against
ever seeing another human being again.

655

00:51:39,013 --> 00:51:41,040

I'm hoping we can surprise
at least three of them.

656

00:51:41,140 --> 00:51:43,125

- How about Mann?

- Dr. Mann?

657

00:51:43,225 --> 00:51:45,211

He's remarkable. He's the best of us.

658

00:51:45,311 --> 00:51:49,757

He inspired 11 people to follow him
on the loneliest journey in human history.

659

00:51:49,857 --> 00:51:51,509

Scientists, explorers.

660

00:51:51,609 --> 00:51:55,796

That's what I love.

You know, out there we face great odds.

661

00:51:56,196 --> 00:51:57,915

Death, but...

662

00:51:59,366 --> 00:52:00,801

not evil.

663

00:52:00,993 --> 00:52:02,845

You don't think nature can be evil?

664

00:52:03,120 --> 00:52:06,089

No. Formidable. Frightening. But...

665

00:52:06,582 --> 00:52:08,684

- ...no, not evil.

- Hm.

666

00:52:09,835 --> 00:52:13,147

Is a lion evil

because it rips a gazelle to shreds?

667

00:52:13,547 --> 00:52:15,949

Just what we take with us, then.

668

00:52:16,091 --> 00:52:17,434

Yeah.

669

00:52:17,551 --> 00:52:19,703

This crew represents
the best of humanity.

670

00:52:19,803 --> 00:52:21,038

Even me, huh?

671

00:52:21,138 --> 00:52:23,207

You know what? We agreed, 90 percent.

672

00:52:23,307 --> 00:52:24,708

There you go.

673

00:52:24,808 --> 00:52:27,253

- Don't stay up.

- I'll be there in a minute.

674

00:52:27,353 --> 00:52:31,498

Just remember, Coop,
you are literally wasting your breath.

675

00:52:38,072 --> 00:52:41,341

Hey, TARS? Let's go over
that trajectory one more time.

676

00:52:41,575 --> 00:52:43,343

TARS: Eight months to Mars.

677

00:52:43,744 --> 00:52:46,647

Counter-orbital slingshot around.

Fourteen months to Saturn.

678

00:52:46,747 --> 00:52:48,232

Nothing's changed on that.

679

00:52:48,332 --> 00:52:50,517

Just let me ask you something.

680

00:52:52,670 --> 00:52:56,231

- Dr. Brand and Edmunds...

- Why are you whispering? They can't hear you.

681

00:52:57,591 --> 00:53:00,661

Dr. Brand and Edmunds. They close?

682

00:53:00,761 --> 00:53:02,246

I wouldn't know.

683

00:53:02,346 --> 00:53:05,316

Is that 90 percent "wouldn't know"

or 10 percent "wouldn't know"?

684

00:53:05,416 --> 00:53:08,245

- I also have a discretion setting, Cooper.

- Aah.

685

00:53:10,104 --> 00:53:12,372

But not a poker face, Slick.

686

00:53:24,618 --> 00:53:26,169

Hey, guys.

687

00:53:26,286 --> 00:53:29,473

Uh, Dad's about to go down

for the long nap.

688

00:53:29,707 --> 00:53:32,401

So I wanted to give you an update.

689

00:53:32,501 --> 00:53:33,727

Uh...

690

00:53:34,169 --> 00:53:37,422

The Earth looks amazing from here. Um...

691

00:53:38,424 --> 00:53:41,327

You can't see any of the dust. Heh.

692

00:53:42,660 --> 00:53:45,656

I really hope you guys are doing great.

693

00:53:45,889 --> 00:53:48,598

I know you're gonna get this message.

Professor Brand's assured me that...

694

00:53:48,698 --> 00:53:50,157

he's gonna get it to you.

695

00:53:50,686 --> 00:53:52,830

Know that I love you.

696

00:53:54,148 --> 00:53:56,583

- Is it him?

- DONALD: I don't think so, Murph.

697

00:54:03,365 --> 00:54:05,133

You must be Donald.

698

00:54:07,244 --> 00:54:08,512

Hello, Murph.

699

00:54:09,163 --> 00:54:11,265

Why are you in my dad's truck?

700

00:54:11,790 --> 00:54:14,059

He wanted me

to bring it for your brother.

701

00:54:14,710 --> 00:54:16,979

He sent you a message.

702

00:54:19,965 --> 00:54:22,034

She's pretty upset with him for leaving.

703

00:54:22,134 --> 00:54:26,321

If you record any messages,
I can get them to transmit it to Cooper.

704

00:54:27,306 --> 00:54:30,075

Murph is a bright spark.

705

00:54:30,976 --> 00:54:33,587

Maybe I should fan the flame.

706

00:54:33,687 --> 00:54:36,340

She's already making fools
of her teachers.

707

00:54:36,440 --> 00:54:39,576

So maybe she should come
and make a fool out of you.

708

00:54:40,360 --> 00:54:43,497

- So where are they?

- Heading for Mars.

709

00:54:43,906 --> 00:54:47,910

The next time you hear from Cooper,
they'll be coming up on Saturn.

710

00:55:28,805 --> 00:55:33,013

TOM [ON RECORDING]: ...administration wants me
to repeat Plant Pathology. Which sucks.

711

00:55:33,413 --> 00:55:36,725

But they said I could start
Advanced Agriculture a year early.

712

00:55:38,418 --> 00:55:42,397

All right, I got to go, Dad.
Hope you're safe up there.

713

00:55:46,343 --> 00:55:47,995

DONALD: Um, sorry, Coop.

714

00:55:48,095 --> 00:55:53,033

I asked Murph to say hi,

but she's as stubborn as her old man.

715

00:55:53,350 --> 00:55:55,285

I'll try again next time.

716

00:56:10,200 --> 00:56:11,852

You all right, Rom?

717

00:56:11,952 --> 00:56:13,553

[COOPER CLEARS THROAT]

718

00:56:14,121 --> 00:56:17,891

This gets to me, Cooper. This. This.

719

00:56:18,292 --> 00:56:21,236

Millimeters of aluminum, that's it,
and then nothing...

720

00:56:21,336 --> 00:56:25,399

out there for millions of miles
won't kill us in seconds.

721

00:56:26,216 --> 00:56:28,202

You know that some of the finest...

722

00:56:28,302 --> 00:56:32,239

solo yachtsmen in the world

don't know how to swim?

723

00:56:32,723 --> 00:56:35,993

They don't know how.

And if they go overboard, psst, they're done.

724

00:56:37,644 --> 00:56:39,705

We're explorers, Rom.

725

00:56:41,148 --> 00:56:44,551

This is our boat. Here.

726

00:56:49,781 --> 00:56:51,883

[CRICKETS CHIRPING ON RECORDING]

727

00:56:54,411 --> 00:56:57,514

[THUNDER RUMBLING

AND RAIN FALLING ON RECORDING]

728

00:57:11,261 --> 00:57:13,080

COOPER:

This is from the, uh... relay probe?

729

00:57:13,180 --> 00:57:15,323

It was in orbit around the Wormhole.

730

00:57:15,724 --> 00:57:18,836

This is the Wormhole,
and every time we'd come around...

731

00:57:18,936 --> 00:57:22,247

we would receive images
from the other side of the foreign galaxy.

732

00:57:22,481 --> 00:57:24,675

Oh, yeah.
Like swinging a periscope around.

733

00:57:24,775 --> 00:57:25,926

Exactly.

734

00:57:26,026 --> 00:57:30,630

So we got a pretty good idea
what we're gonna find on the other side, huh?

735

00:57:31,615 --> 00:57:33,050

Navigationally.

736

00:57:34,409 --> 00:57:38,463

AMELIA: Guys? Looks like we'll be approaching
the Wormhole in about three hours.

737

00:57:44,544 --> 00:57:45,887

Hey, Coop?

738

00:57:46,463 --> 00:57:49,533

- Can we stop the spinning?

- Why?

739

00:57:49,633 --> 00:57:52,269

Because we're close enough
to see it now?

740

00:57:53,804 --> 00:57:54,997

All right.

741

00:57:55,097 --> 00:57:56,281

Thanks.

742

00:58:01,937 --> 00:58:03,964

There, that's it! That's the Wormhole!

743

00:58:04,064 --> 00:58:07,593

Say it, don't spray it, Rom. It's a sphere.

744

00:58:07,693 --> 00:58:11,955

Of course it is. What, you...?

You thought it would just be a hole?

745

00:58:12,864 --> 00:58:16,051

No, it's just that all the illustrations

I've ever seen, they...

746

00:58:16,493 --> 00:58:19,679

ROMILLY: In the illustrations,

they're trying to show you how it works.

747

00:58:20,288 --> 00:58:24,359

So they say you want to go
from here to there.

748

00:58:24,459 --> 00:58:26,783

- But it's too far, right?

- Mm-hm.

749

00:58:27,170 --> 00:58:32,067

So a Wormhole bends space like this,
so you can take a shortcut through...

750

00:58:32,300 --> 00:58:33,952

a higher dimension.

751

00:58:34,052 --> 00:58:35,612

Okay, so...

752

00:58:35,846 --> 00:58:38,783

to show that,
they've turned three-dimensional space

753

00:58:38,883 --> 00:58:43,962

into two dimensions which turns a Wormhole
into two dimensions, a circle.

754

00:58:44,062 --> 00:58:46,614

What's a circle in three dimensions?

755

00:58:47,524 --> 00:58:49,126

- A sphere.

- Exactly.

756

00:58:49,443 --> 00:58:51,044

A spherical hole.

757

00:58:51,486 --> 00:58:54,422

But who put it there?

Who do we have to thank?

758

00:58:54,740 --> 00:58:59,511

I'm not thanking anybody until we
get out of here in one piece, Rom.

759

00:59:06,426 --> 00:59:08,445

COOPER: Any trick to this, Doyle?

760

00:59:09,379 --> 00:59:11,148

No one knows.

761

00:59:18,180 --> 00:59:19,948

The others made it, right?

762

00:59:21,892 --> 00:59:23,660

At least some of them.

763

00:59:55,509 --> 00:59:58,778

Everybody ready to say goodbye
to our solar system?

764

00:59:59,554 --> 01:00:01,656

To our galaxy.

765

01:00:03,475 --> 01:00:04,618

Here we go.

766

01:00:16,196 --> 01:00:18,298

[HULL CREAKING AND ALARMS BEEPING]

767

01:00:37,134 --> 01:00:40,704

The controls won't work here.

We're passing through the bulk.

768

01:00:40,804 --> 01:00:45,325

It's space beyond our three dimensions.

All you can do is record and observe.

769

01:00:56,403 --> 01:00:57,545

What is that?

770

01:00:59,823 --> 01:01:03,927

- I think it's them.

- Distorting space-time.

771

01:01:05,912 --> 01:01:07,097

ROMILLY: Don't! Don't!

772

01:01:29,436 --> 01:01:31,037

[BEEPING STOPS]

773

01:01:35,025 --> 01:01:36,576

What was that?

774

01:01:39,279 --> 01:01:40,880

The first handshake.

775

01:01:42,449 --> 01:01:43,891

We're...

776

01:01:45,118 --> 01:01:46,753

We're here.

777

01:02:06,806 --> 01:02:09,126

DOYLE:

So the lost communications came through.

778

01:02:09,226 --> 01:02:12,170

- How?

- The relay on this side cached them.

779

01:02:12,270 --> 01:02:15,915

So years of basic data.

No real surprises.

780

01:02:16,733 --> 01:02:20,437

Miller's site has kept ping-pong thumbs up,
as has Dr. Mann's. Um...

781

01:02:20,537 --> 01:02:22,931

Edmunds' went down three years ago.

782

01:02:23,031 --> 01:02:24,307

Transmitter failure?

783

01:02:24,407 --> 01:02:27,477

Maybe. He was sending the thumbs up
right until it went dark.

784

01:02:27,577 --> 01:02:29,396

But Miller's still
looks good though, right?

785

01:02:29,496 --> 01:02:31,890

- Because she's coming up fast.

- DOYLE: Mm-hm.

786

01:02:32,249 --> 01:02:34,351

With one complication.

787

01:02:34,668 --> 01:02:37,737

The planet is much closer to Gargantua
than we thought.

788

01:02:37,837 --> 01:02:40,574

- COOPER: Gargantua?

- It's what we're calling the black hole.

789

01:02:40,674 --> 01:02:43,034

Miller's and Dr. Mann's planets
both orbit it.

790

01:02:43,134 --> 01:02:46,413

- And Miller's is on the horizon?

- ROMILLY: As a basketball around a hoop.

791

01:02:46,513 --> 01:02:48,582

Landing there takes us

dangerously close.

792

01:02:48,682 --> 01:02:52,035

And a black hole that big
has a huge gravitational pull.

793

01:02:54,521 --> 01:02:57,591

Look, I could swing around
that neutron star to decelerate.

794

01:02:57,691 --> 01:02:59,434

AMELIA: No, it's not that. It's time.

795

01:02:59,534 --> 01:03:04,339

The gravity on that planet will slow
our clock compared to Earth's drastically.

796

01:03:04,864 --> 01:03:06,099

How bad?

797

01:03:06,199 --> 01:03:09,844

Every hour we spend
on that planet will be...

798

01:03:10,620 --> 01:03:12,889

seven years back on Earth.

799

01:03:13,665 --> 01:03:14,808

Jesus.

800

01:03:15,041 --> 01:03:16,810

Well, that's relativity, folks.

801

01:03:18,128 --> 01:03:20,655

Well, we can't just drop down
there without...

802

01:03:20,755 --> 01:03:22,699

Cooper, we have a mission.

803

01:03:22,799 --> 01:03:25,452

Yeah, Doyle, we have a mission,
and our mission Plan A is...

804

01:03:25,552 --> 01:03:28,788

to find a planet that can habitate
the people that are living on Earth right now.

805

01:03:28,888 --> 01:03:31,791

You can't just think about your family.
Now you have to think bigger than that.

806

01:03:31,891 --> 01:03:34,970

I am thinking about my family
and millions of other families, okay?

807

01:03:35,070 --> 01:03:39,624

Plan A does not work if the people on Earth
are dead by the time we pull it off.

808

01:03:40,717 --> 01:03:44,587

No. It doesn't.
That's why there's a Plan B.

809

01:03:46,406 --> 01:03:49,449

Okay. Cooper's right.
We need to think of time as a resource,

810

01:03:49,549 --> 01:03:52,011

just like oxygen and food.

Going down it's gonna cost us.

811

01:03:54,289 --> 01:03:55,957

All right, look.

812

01:03:56,750 --> 01:04:00,278

Dr. Mann's data is promising,

but it's gonna take months to get there.

813

01:04:00,378 --> 01:04:02,656

And Edmunds', it's even further.

814

01:04:02,756 --> 01:04:06,993

Miller hasn't sent much, but what she has
is very promising. It's water, it's organics...

815

01:04:07,093 --> 01:04:09,329

- You don't find that every day.

- No, you don't.

816

01:04:09,429 --> 01:04:11,831

And just think about the resources,
including time...

817

01:04:11,931 --> 01:04:14,534

that would be spent
trying to get back here.

818

01:04:15,560 --> 01:04:17,020

- Romilly...

- Yeah?

819

01:04:17,120 --> 01:04:21,424

...how far off from Miller's planet do we
have to be to stay out of the time shift?

820

01:04:21,524 --> 01:04:23,260

Just back from the cusp.

821

01:04:23,360 --> 01:04:26,388

All right, which is here,
just outside of Miller's planet.

822

01:04:26,488 --> 01:04:28,381

- ROMILLY: Right.

- Okay.

823

01:04:29,199 --> 01:04:32,060

Here's Gargantua.

Here's Miller's planet.

824

01:04:32,160 --> 01:04:35,397

Instead of taking the Endurance
into orbit around Miller's planet...

825

01:04:35,497 --> 01:04:38,441

which would conserve fuel,
but we would lose a lot of time...

826

01:04:38,541 --> 01:04:41,709

what if we take a wider orbit
around Gargantua,

827

01:04:41,809 --> 01:04:45,365

parallel with Miller's planet
outside of this time shift, to here?

828

01:04:45,465 --> 01:04:48,326

Then we take the Ranger down,
we get Miller, we get her samples.

829

01:04:48,426 --> 01:04:51,204

We come back, we analyze, we debrief.
We're in, we're out.

830

01:04:51,304 --> 01:04:53,707

We lose a little fuel,
but we save a whole lot of time.

831

01:04:53,807 --> 01:04:55,509

- That'll work.
- That's good.

832

01:04:55,609 --> 01:04:58,136

There's no time for monkey business
or chit-chat down there.

833

01:04:58,236 --> 01:05:01,098

So, TARS,
you should definitely stay here.

834

01:05:01,198 --> 01:05:03,717

CASE, you're with me.

Anyone else can stay.

835

01:05:03,817 --> 01:05:07,935

If we're talking about a couple years,

I could use the time to research gravity.

836

01:05:08,035 --> 01:05:10,598

Observations from the Wormhole,

that's gold to Professor Brand.

837

01:05:10,698 --> 01:05:12,434

COOPER:

TARS, factor an orbit of Gargantua.

838

01:05:12,534 --> 01:05:17,355

Conserve fuel, minimize thrusting,

but make sure we stay in range of Miller's planet.

839

01:05:17,455 --> 01:05:20,066

- You got it?

- TARS: I wouldn't leave you behind...

840

01:05:20,166 --> 01:05:21,309

Dr. Brand.

841

01:05:25,880 --> 01:05:27,607

- COOPER: You ready, CASE?

- CASE: Yup.

842

01:05:28,466 --> 01:05:32,070

- You don't say much, do you?

- TARS talks plenty for both of us.

843

01:05:33,179 --> 01:05:34,322

Detach.

844

01:05:41,521 --> 01:05:44,582

- Romilly, are you reading these forces?

- ROMILLY: It's unbelievable.

845

01:05:47,694 --> 01:05:50,221

A literal heart of darkness.

846

01:05:53,992 --> 01:05:56,770

If we could just see
the collapsed star inside...

847

01:05:56,870 --> 01:05:59,722

the singularity, yeah,
we'd solve gravity.

848

01:06:00,039 --> 01:06:03,401

- And we can't get anything from it?
- Nothing escapes that horizon.

849

01:06:03,501 --> 01:06:04,903

Not even light.

850

01:06:05,003 --> 01:06:08,606

- The answer's there, just no way to see it.
- There's Miller's planet.

851

01:06:11,176 --> 01:06:13,210

Goodbye, Ranger.

852

01:06:25,315 --> 01:06:27,675

CASE:

This is fast for atmospheric entry.

853

01:06:27,775 --> 01:06:30,128

- Should we use the thrusters to slow?

- No.

854

01:06:30,487 --> 01:06:33,890

I'm gonna use the Ranger's aerodynamics
to save some fuel.

855

01:06:33,990 --> 01:06:35,266

CASE: Air brake?

856

01:06:35,366 --> 01:06:38,978

- We want to get down fast, don't we?

- We want to get there in one piece.

857

01:06:39,078 --> 01:06:42,181

- Hang on.

- CASE: Brand, Doyle, get ready.

858

01:06:51,299 --> 01:06:53,359

[ALARMS BEEPING]

859

01:06:57,931 --> 01:07:00,500

- CASE: We should ease!

- COOPER: Hands where I can see them.

860

01:07:00,600 --> 01:07:04,003

The only time I went down was

when a machine was easing at the wrong time.

861

01:07:04,103 --> 01:07:07,006

- A little caution...

- Can get you killed, like reckless driving.

862

01:07:07,106 --> 01:07:09,375

- Cooper, it's too damn fast!

- I got this.

863

01:07:14,113 --> 01:07:18,217

- CASE: Should I disable the feedback?

- No. I need to feel the air.

864

01:07:22,321 --> 01:07:23,589

Here we go.

865

01:07:26,584 --> 01:07:27,977

It's just water!

866

01:07:29,379 --> 01:07:30,980

The stuff of life.

867

01:07:31,339 --> 01:07:32,824

CASE: Twelve hundred meters.

868

01:07:32,924 --> 01:07:35,034

- Do we have a fix on the beacon?

- CASE: Got it!

869

01:07:35,134 --> 01:07:37,829

- Can you maneuver?

- I'll need to shave some speed.

870

01:07:37,929 --> 01:07:40,657

I'm gonna spiral down on top of it.

Everybody hang on!

871

01:07:42,976 --> 01:07:44,118

CASE: Seven hundred.

872

01:07:46,145 --> 01:07:48,247

On my cue, CASE. On my cue.

873

01:07:51,651 --> 01:07:53,252

CASE: Five hundred meters.

874

01:08:02,620 --> 01:08:03,763

Fire!

875

01:08:17,218 --> 01:08:19,654

- Very graceful.

- No.

876

01:08:20,179 --> 01:08:23,365

But very efficient.

877

01:08:24,726 --> 01:08:27,003

What are you waiting for? Let's go!

878

01:08:27,103 --> 01:08:29,122

Go, go, go!

879

01:08:29,239 --> 01:08:32,792

Seven years per hour here.

Let's make it count!

880

01:08:49,834 --> 01:08:51,644

[PANTING]

881

01:08:58,801 --> 01:09:00,153

CASE: This way.

882

01:09:02,889 --> 01:09:04,741

About 200 meters.

883

01:09:14,150 --> 01:09:16,277

The gravity's punishing.

884

01:09:16,736 --> 01:09:18,930

Been floating through space too long?

885

01:09:19,030 --> 01:09:21,307

CASE: 110% Earth gravity.

886

01:09:21,407 --> 01:09:23,709

COOPER: Come on. Come on.

887

01:09:26,037 --> 01:09:28,973

- There's nothing here.

- CASE: Should be right here.

888

01:09:30,792 --> 01:09:34,095

If the signal's

coming from here, then...

889

01:09:43,429 --> 01:09:45,097

Her beacon.

890

01:09:52,730 --> 01:09:53,873

DOYLE: Wreckage.

891

01:09:54,440 --> 01:09:55,708

Where's the rest?

892

01:09:56,109 --> 01:09:57,710

Towards the mountains!

893

01:10:01,447 --> 01:10:03,382

Those aren't mountains.

894

01:10:04,951 --> 01:10:06,385

They're waves.

895

01:10:11,624 --> 01:10:14,393

Oh, shit. Oh, shit. Oh, shit.

896

01:10:14,794 --> 01:10:16,896

COOPER: That one's moving away from us.

897

01:10:23,302 --> 01:10:25,071

AMELIA: We need the recorder.

898

01:10:35,148 --> 01:10:37,467

Brand, Doyle, back to the Ranger now!

899

01:10:37,567 --> 01:10:41,012

We're not leaving without her data.

900

01:10:41,112 --> 01:10:44,390

Get back here now! We do not have time!

901

01:10:44,490 --> 01:10:47,051

The second wave is coming!

We're in the middle of a swell.

902

01:10:48,244 --> 01:10:49,729

AMELIA: No, I got it.

903

01:10:49,829 --> 01:10:51,931

Get your ass back to the Ranger now!

904

01:10:52,665 --> 01:10:54,100

[GRUNTING]

905

01:10:56,836 --> 01:10:58,980

Brand, get back here now!

906

01:11:00,840 --> 01:11:03,150

AMELIA: No, Cooper, go.

Cooper, go. I can't make it.

907

01:11:03,468 --> 01:11:05,945

- Go!

- CASE, go get her.

908

01:11:10,641 --> 01:11:12,743

- Go!

- Get up. Get up, Brand!

909

01:11:13,561 --> 01:11:15,162

DOYLE: Go, go! Go!

910

01:11:16,647 --> 01:11:19,584

- I'm not gonna make it!

- Yes, you are. Yes, you are!

911

01:11:26,324 --> 01:11:28,718

Come on, CASE has her!

Get back here, Doyle!

912

01:11:31,621 --> 01:11:33,005

Come on!

913

01:11:35,458 --> 01:11:36,976

Get to the hatch!

914

01:11:41,422 --> 01:11:43,024

Go, go! Go!

915

01:11:48,471 --> 01:11:49,655

Shit.

916

01:11:50,056 --> 01:11:51,991

Manually overriding inside hatch!

917

01:11:55,394 --> 01:11:56,662

Cooper! Wait!

918

01:12:03,903 --> 01:12:07,673

COOPER: The engines are flooded!

I'm gonna have to shut her down.

919

01:12:12,119 --> 01:12:13,804

[AMELIA YELLING]

920

01:12:41,023 --> 01:12:42,458

Holy shit.

921

01:12:46,779 --> 01:12:48,214

Hang on!

922

01:12:52,827 --> 01:12:54,428

[YELLING]

923

01:13:19,353 --> 01:13:23,290

- CASE, what's the problem?

- Too waterlogged. Let it drain.

924

01:13:24,317 --> 01:13:25,593

Goddamn it!

925

01:13:25,693 --> 01:13:30,431

- I told you to leave me! Why didn't you?

- And I told you to get your ass back here!

926

01:13:30,531 --> 01:13:35,302

- One of us was thinking about the mission!

- You were thinking about getting home.

927

01:13:37,038 --> 01:13:39,440

I was trying to do the right thing!

928

01:13:39,540 --> 01:13:41,600

Can you tell that to Doyle?

929

01:13:43,594 --> 01:13:46,063

- COOPER: CASE, how much time?

- Forty-five to an hour.

930

01:13:47,757 --> 01:13:51,545

The stuff of life, huh?

What's this gonna cost us, Brand?

931

01:13:52,345 --> 01:13:54,372

A lot. Decades.

932

01:13:54,472 --> 01:13:56,198

[PANTING]

933

01:13:58,768 --> 01:14:00,119

[GROANS]

934

01:14:01,520 --> 01:14:02,955

What happened to Miller?

935

01:14:03,606 --> 01:14:09,220

Judging by the wreckage, she was
broken up by a wave soon after impact.

936

01:14:09,320 --> 01:14:12,256

How's the wreckage stayed together
after all these years, huh?

937

01:14:13,407 --> 01:14:15,709

Because of the time slippage.

938

01:14:16,535 --> 01:14:21,140

On this planet's time,
she just landed hours ago.

939

01:14:21,958 --> 01:14:24,402

She probably just died minutes ago.

940

01:14:24,502 --> 01:14:28,647

CASE: The data Doyle received was just
the initial status echoing endlessly.

941

01:14:28,923 --> 01:14:31,192

Oh, we are not prepared for this.

942

01:14:33,469 --> 01:14:36,998

You eggheads have the survival skills
of a Boy Scout troop.

943

01:14:37,098 --> 01:14:40,418

Well, we got this far on our brains.
Farther than any human in history.

944

01:14:40,518 --> 01:14:42,336

Well, not far enough!

945

01:14:42,436 --> 01:14:46,040

And now we're stuck here till there
won't be anyone left on Earth to save.

946

01:14:48,985 --> 01:14:51,754

I'm counting every minute,
same as you, Cooper.

947

01:14:56,450 --> 01:14:58,352

Is there any possibility...

948

01:14:58,452 --> 01:15:02,148

I don't know, some kind of a way
we can maybe all jump in a black hole?

949

01:15:02,248 --> 01:15:04,016

Gain back the years?

950

01:15:04,583 --> 01:15:06,152

Don't shake your head at me.

951

01:15:06,252 --> 01:15:08,321

Time is relative, okay?

952

01:15:08,421 --> 01:15:11,565

It can stretch

and it can squeeze, but...

953

01:15:11,966 --> 01:15:14,243

it can't run backwards. It just can't.

954

01:15:14,343 --> 01:15:18,864

The only thing that can move across
dimensions, like time, is gravity.

955

01:15:21,475 --> 01:15:22,943

Okay.

956

01:15:24,603 --> 01:15:28,549

The beings that led us here,
they communicate...

957

01:15:28,649 --> 01:15:30,551

- ...through gravity, right?

- Yes.

958

01:15:30,651 --> 01:15:32,920

Could they be talking to us
from the future?

959

01:15:33,738 --> 01:15:36,090

- Maybe.

- Okay. If they can...

960

01:15:37,199 --> 01:15:40,553

"They" are beings of five dimensions.

961

01:15:40,870 --> 01:15:44,306

To them, time might be
another physical dimension.

962

01:15:44,540 --> 01:15:45,975

To them...

963

01:15:46,292 --> 01:15:50,529

the past might be a canyon
that they can climb into and the future...

964

01:15:50,629 --> 01:15:53,732

a mountain they can climb up.

But to us, it's not, okay?

965

01:15:54,717 --> 01:15:58,236

Look, Cooper, I screwed up. I'm sorry.

966

01:15:59,305 --> 01:16:02,658

- But you knew about relativity.

- Oh.

967

01:16:04,268 --> 01:16:05,936

[SOFTLY] Brand...

968

01:16:07,772 --> 01:16:09,290

[SIGHS]

969

01:16:10,316 --> 01:16:12,535

my daughter was 10 years old.

970

01:16:12,860 --> 01:16:15,754

I couldn't teach her

Einstein's theories before I left.

971

01:16:16,072 --> 01:16:19,008

Couldn't you have told her
you were going to save the world?

972

01:16:19,492 --> 01:16:21,034

No.

973

01:16:22,203 --> 01:16:26,673

When you become a parent,
one thing becomes really clear.

974

01:16:27,875 --> 01:16:31,145

And that is that you want to make sure
your children feel safe.

975

01:16:32,088 --> 01:16:36,241

And it rules out telling a 10-year-old
that the world is ending.

976

01:16:38,202 --> 01:16:39,778

Cooper?

977

01:16:40,012 --> 01:16:42,323

[DISTANT RUMBLING]

978

01:16:43,390 --> 01:16:45,960

- How long for the engines, CASE?

- A minute or two.

979

01:16:46,060 --> 01:16:48,245

We don't have it. Helmets on!

980

01:16:52,066 --> 01:16:53,926

Brand, co-pilot, you're up.

981

01:16:54,026 --> 01:16:56,595

CASE, blow the cabin oxygen
through the main thrusters!

982

01:16:56,695 --> 01:16:58,505

- We're gonna spark it.

- Roger that.

983

01:16:58,697 --> 01:17:00,132

- Locked.

- Depressurizing.

984

01:17:05,913 --> 01:17:07,264

Engines up!

985

01:17:36,026 --> 01:17:37,628

Hello, Rom.

986

01:17:37,987 --> 01:17:39,955

I've waited years.

987

01:17:40,739 --> 01:17:43,275

How...? How many years?

988

01:17:44,410 --> 01:17:47,438

- ROMILLY: By now it must be...

- CASE: Twenty-three years...

989

01:17:47,538 --> 01:17:49,548

four months, eight days.

990

01:17:53,669 --> 01:17:55,337

Doyle?

991

01:18:01,051 --> 01:18:04,254

I thought I was prepared.

I knew the theory.

992

01:18:05,431 --> 01:18:07,032

Reality's different.

993

01:18:07,975 --> 01:18:09,744

And Miller?

994

01:18:10,728 --> 01:18:12,830

There's nothing here for us.

995

01:18:15,582 --> 01:18:17,084

Why didn't you sleep?

996

01:18:17,943 --> 01:18:22,131

Oh, I had a couple of stretches.

But I stopped believing you were coming back.

997

01:18:22,531 --> 01:18:25,634

And something seemed wrong
about dreaming my life away.

998

01:18:26,368 --> 01:18:29,305

I learned what I could
from the black hole...

999

01:18:29,580 --> 01:18:32,108

but I couldn't send anything
to your father.

1000

01:18:32,208 --> 01:18:34,527

We've been receiving,
but nothing gets out.

1001

01:18:34,627 --> 01:18:37,012

- AMELIA: Is he alive?
- Oh, yeah.

1002

01:18:37,129 --> 01:18:39,323

- Yeah?
- Yeah.

1003

01:18:41,926 --> 01:18:45,029

ROMILLY:

We've got years of messages stored.

1004

01:18:45,221 --> 01:18:46,455

Cooper.

1005

01:18:46,555 --> 01:18:49,858

COMPUTER: Messages span 23 years.

1006

01:18:51,602 --> 01:18:53,370

Play it from the beginning.

1007

01:18:56,315 --> 01:18:58,325

TOM [ON RECORDING]: Hey, Dad.

1008

01:18:58,859 --> 01:19:01,578

Checking in. Saying hi.

1009

01:19:02,363 --> 01:19:03,931

Um...

1010

01:19:04,031 --> 01:19:06,124

Finished second in school.

1011

01:19:07,409 --> 01:19:10,020

Miss Kurling's still
giving me C's though.

1012

01:19:10,120 --> 01:19:13,257

Pulled me down, but seconds not bad.

1013

01:19:14,124 --> 01:19:16,693

Grandpa attended the ceremony.

1014

01:19:17,920 --> 01:19:20,022

Um... Oh.

1015

01:19:20,881 --> 01:19:22,908

I met another girl, Dad.

1016

01:19:23,008 --> 01:19:24,893

I, uh...

1017

01:19:25,344 --> 01:19:27,646

I really think this is the one.

1018

01:19:28,639 --> 01:19:31,925

Name's Lois. That's her right there.

1019

01:19:34,270 --> 01:19:36,772

Murphy stole Grandpa's car.

1020

01:19:36,939 --> 01:19:40,008

She crashed it. She's okay, though.

1021

01:19:40,276 --> 01:19:41,760

Hey, Dad.

1022

01:19:42,278 --> 01:19:43,912

Look at this!

1023

01:19:44,446 --> 01:19:46,248

You're a grandpa.

1024

01:19:47,366 --> 01:19:49,334

His name's Jesse.

1025

01:19:49,702 --> 01:19:54,857

I kind of wanted to call him Coop,
but Lois says, uh... maybe next time.

1026

01:19:54,957 --> 01:19:59,478

Donald says he's already earned
the "great" part, so we just leave it at that.

1027

01:20:01,088 --> 01:20:02,448

[TOM SPEAKS INDISTINCTLY]

1028

01:20:02,548 --> 01:20:04,441

LOIS: Oh, dear. Oh, dear.

1029

01:20:05,134 --> 01:20:09,071

Say "Bye-bye, Grandpa."

Bye-bye, Grandpa. Okay.

1030

01:20:09,388 --> 01:20:11,990

Sorry it's been a while.

1031

01:20:13,267 --> 01:20:14,910

Just...

1032

01:20:16,520 --> 01:20:18,922

what with Jesse and all.

1033

01:20:21,900 --> 01:20:23,502

Uh...

1034

01:20:25,029 --> 01:20:27,664

Grandpa died last week.

1035

01:20:27,781 --> 01:20:31,368

We buried him out in the back forty
next to Mom and...

1036

01:20:31,744 --> 01:20:33,428

Jesse.

1037

01:20:33,704 --> 01:20:37,290

Which is where we would have buried you
if you'd ever...

1038

01:20:37,541 --> 01:20:39,643

come back.

1039

01:20:40,544 --> 01:20:43,096

Murph was there at the funeral.

1040

01:20:43,422 --> 01:20:46,375

We don't see her that much,
but she came for that.

1041

01:20:49,386 --> 01:20:52,405

You aren't listening to this,
I know that.

1042

01:20:54,933 --> 01:20:57,786

All these messages are just, like...

1043

01:20:58,854 --> 01:21:03,024

drifting out there in the darkness.

1044

01:21:03,609 --> 01:21:06,044

Lois says that, uh...

1045

01:21:06,737 --> 01:21:09,765

I have to let you go.

1046

01:21:09,865 --> 01:21:11,800

And, uh...

1047

01:21:12,201 --> 01:21:13,885

So...

1048

01:21:16,538 --> 01:21:19,825

I guess I'm letting you go.

1049

01:21:20,584 --> 01:21:23,753

I don't know where you are, Dad...

1050

01:21:23,879 --> 01:21:26,807

but I hope that you're at peace.

1051

01:21:28,300 --> 01:21:29,685

Goodbye.

1052

01:21:42,981 --> 01:21:44,633

Hey, Dad.

1053

01:21:47,069 --> 01:21:48,304

Hey, Murph.

1054

01:21:48,404 --> 01:21:50,822

You son of a bitch.

1055

01:21:54,034 --> 01:21:56,603

I never made one of these
when you were still responding...

1056

01:21:56,703 --> 01:21:59,339

because I was so mad at you for leaving.

1057

01:22:02,084 --> 01:22:04,569

And then when you went quiet, it...

1058

01:22:06,797 --> 01:22:10,233

seemed like I should live with that decision.

And I have.

1059

01:22:14,138 --> 01:22:16,857

But today's my birthday.

1060

01:22:20,227 --> 01:22:23,897

And it's a special one,
because you told me...

1061

01:22:27,526 --> 01:22:32,164

You once told me that when you came back,
we might be the same age.

1062

01:22:33,574 --> 01:22:36,960

And today I'm the age you were
when you left.

1063

01:22:39,663 --> 01:22:41,815

So it would be a real good time
for you to come back.

1064

01:22:41,915 --> 01:22:43,684

[BOTH SOBBING]

1065

01:22:50,215 --> 01:22:51,608

[SNIFFLES]

1066

01:22:56,221 --> 01:23:00,617

I didn't mean to intrude. It's just that

I've never seen you in here before.

1067

01:23:01,143 --> 01:23:03,412

I've never been in here before.

1068

01:23:05,189 --> 01:23:10,427

BRAND: I talk to Amelia

all the time. It helps.

1069

01:23:10,694 --> 01:23:13,514

- I'm glad you've started.

- MURPH: I haven't. I...

1070

01:23:13,614 --> 01:23:16,216

I just had something

I needed to get out.

1071

01:23:16,450 --> 01:23:18,936

- I know they're still out there.

- I know.

1072

01:23:19,036 --> 01:23:23,315

There are so many reasons their
communications might not be getting through.

1073

01:23:23,415 --> 01:23:24,933

I know, professor.

1074

01:23:25,459 --> 01:23:28,478

I'm not sure what I'm more afraid of.

1075

01:23:29,546 --> 01:23:32,382

Them never coming back or...

1076

01:23:33,091 --> 01:23:36,370

coming back to find we've failed.

1077

01:23:36,470 --> 01:23:37,988

Then let's succeed.

1078

01:23:38,931 --> 01:23:40,473

So...

1079

01:23:40,682 --> 01:23:44,920

back to the fourth iteration.

Let's run it through some new fields.

1080

01:23:45,020 --> 01:23:48,424

With respect, professor,

we've tried that hundreds of times.

1081

01:23:48,524 --> 01:23:52,694

It only has to work once, Murph.

1082

01:23:55,489 --> 01:23:59,435

BRAND: Every rivet that they strike
could have been a bullet.

1083

01:23:59,535 --> 01:24:01,603

We've done well for the world here...

1084

01:24:01,703 --> 01:24:06,525

whether or not we crack the equation
before I kick the bucket.

1085

01:24:06,625 --> 01:24:09,603

- Don't be morbid, professor.

- I'm not afraid of death.

1086

01:24:10,254 --> 01:24:12,589

I'm an old physicist.

1087

01:24:13,340 --> 01:24:15,108

I'm afraid of time.

1088

01:24:22,182 --> 01:24:23,450

MURPH: Time.

1089

01:24:25,394 --> 01:24:27,162

You're afraid of time.

1090

01:24:29,648 --> 01:24:31,717

We've been trying
to solve the equation...

1091
01:24:31,817 --> 01:24:34,386
without changing
the underlying assumption about time.

1092
01:24:34,486 --> 01:24:36,263
- And?
- And that means...

1093
01:24:36,363 --> 01:24:40,893
each iteration is an attempt
to prove its own proof.

1094
01:24:40,993 --> 01:24:43,312
It's recursive. It's nonsensical.

1095
01:24:43,412 --> 01:24:47,274
Are you calling my life's work...
nonsense, Murph?

1096
01:24:47,374 --> 01:24:49,285

No, I'm saying
that you've been trying to...

1097

01:24:49,385 --> 01:24:53,680

finish it with one arm...

No, with both arms tied behind your back.

1098

01:24:55,465 --> 01:24:57,867

And I don't understand why.

1099

01:24:58,427 --> 01:25:00,662

I'm an old man, Murph.

1100

01:25:01,179 --> 01:25:03,874

Can we take this point up
at another time?

1101

01:25:03,974 --> 01:25:06,401

I want to talk to my daughter.

1102

01:25:08,270 --> 01:25:10,797

BRAND [ON RECORDING]:

Stepping out into the universe...

1103

01:25:10,897 --> 01:25:14,793

we must confront the reality
of interstellar travel.

1104

01:25:15,611 --> 01:25:20,224

We must reach far beyond
our own lifespans.

1105

01:25:20,324 --> 01:25:25,854

We must think not as individuals
but as a species.

1106

01:25:28,290 --> 01:25:31,617

Do not go gentle into that good night

1107

01:25:33,086 --> 01:25:35,739

COOPER: TARS kept the Endurance
right where we needed her.

1108

01:25:35,839 --> 01:25:38,734

But the trip took years longer
than we anticipated.

1109

01:25:38,967 --> 01:25:42,571

We no longer have the fuel
to visit both prospects, so...

1110

01:25:42,804 --> 01:25:44,606

we have to choose.

1111

01:25:45,515 --> 01:25:46,942

But how?

1112

01:25:47,684 --> 01:25:49,653

They're both promising.

1113

01:25:50,896 --> 01:25:55,467

Edmunds' data is better, but Dr. Mann
is the one still transmitting, so...

1114

01:25:55,567 --> 01:25:58,787

We've no reason to suspect
Edmunds's data would have soured.

1115

01:25:59,404 --> 01:26:01,974

His world has key elements
to sustain human life.

1116

01:26:02,074 --> 01:26:05,543

- As does Dr. Mann's.
- Cooper, this is my field.

1117

01:26:06,411 --> 01:26:07,754

And...

1118

01:26:08,246 --> 01:26:10,482

I really believe Edmunds'
is the better prospect.

1119

01:26:10,582 --> 01:26:14,219

- Why?
- Gargantua, that's why.

1120

01:26:15,045 --> 01:26:19,157

Look at Miller's planet.
Hydrocarbons, organics, yes...

1121

01:26:19,257 --> 01:26:23,979

but no life. Sterile.

We'll find the same thing on Mann's.

1122

01:26:24,096 --> 01:26:25,956

Because of the black hole?

1123

01:26:26,056 --> 01:26:29,167

Murphy's Law.

Whatever can happen will happen.

1124

01:26:29,267 --> 01:26:31,670

Accident is the first building block
of evolution.

1125

01:26:31,770 --> 01:26:34,673

But when you're orbiting a black hole
not enough can happen.

1126

01:26:34,773 --> 01:26:39,344

It sucks in asteroids and comets,
other events which would otherwise reach you.

1127

01:26:39,444 --> 01:26:41,579

We need to go further afield.

1128

01:26:41,905 --> 01:26:44,541

You once said that Dr. Mann...

1129

01:26:45,492 --> 01:26:47,185

was the best of us.

1130

01:26:47,285 --> 01:26:50,755

He's remarkable.

We're only here because of him.

1131

01:26:50,997 --> 01:26:52,899

And yet... Yet here he is.

1132

01:26:52,999 --> 01:26:57,285

He's on the ground, and he's sending
a very unambiguous message,

1133

01:26:57,385 --> 01:26:59,906

telling us to come to his planet.

1134

01:27:00,006 --> 01:27:04,936

Granted, but Edmunds' data
is more promising.

1135

01:27:05,095 --> 01:27:06,204

We should vote.

1136

01:27:06,304 --> 01:27:08,773

Well, if we vote,
there's something you should know.

1137

01:27:09,599 --> 01:27:12,777

Brand? He has a right to know.

1138

01:27:12,978 --> 01:27:14,796

That has nothing to do with it.

1139

01:27:14,896 --> 01:27:18,008

- What does?

- She's in love with Wolf Edmunds.

1140

01:27:18,108 --> 01:27:21,152

- ROMILLY: Is that true?

- Yes.

1141

01:27:23,822 --> 01:27:26,833

And that makes me
want to follow my heart.

1142

01:27:29,995 --> 01:27:33,732

But maybe we've spent too long trying
to figure all this out with theory.

1143

01:27:33,832 --> 01:27:35,317

You're a scientist, Brand.

1144

01:27:35,417 --> 01:27:37,260

So listen to me...

1145

01:27:37,794 --> 01:27:42,807

when I say that love
isn't something we invented. It's...

1146

01:27:43,508 --> 01:27:46,144

observable, powerful.

1147

01:27:47,929 --> 01:27:49,606

It has to mean something.

1148

01:27:49,706 --> 01:27:54,052

Love has meaning, yes. Social utility,
social bonding, child rearing...

1149

01:27:54,152 --> 01:27:57,956

We love people who have died.
Where's the social utility in that?

1150

01:27:58,398 --> 01:27:59,508

None.

1151

01:27:59,608 --> 01:28:03,553

Maybe it means something more,
something we can't...

1152

01:28:03,653 --> 01:28:05,764

yet understand.

1153

01:28:05,864 --> 01:28:09,626

Maybe it's some evidence, some...

1154

01:28:10,285 --> 01:28:14,815

artifact of a higher dimension

that we can't consciously perceive.

1155

01:28:14,915 --> 01:28:19,778

I'm drawn across the universe

to someone I haven't seen in a decade...

1156

01:28:19,878 --> 01:28:22,948

who I know is probably dead.

1157

01:28:23,048 --> 01:28:26,451

Love is the one thing

we're capable of perceiving...

1158

01:28:26,551 --> 01:28:29,687

that transcends dimensions

of time and space.

1159

01:28:31,223 --> 01:28:35,860

Maybe we should trust that,
even if we can't understand it yet.

1160

01:28:40,565 --> 01:28:42,534

All right, Cooper...

1161

01:28:44,110 --> 01:28:45,703

yes...

1162

01:28:46,571 --> 01:28:50,108

the tiniest possibility
of seeing Wolf again excites me.

1163

01:28:50,742 --> 01:28:52,710

That doesn't mean I'm wrong.

1164

01:28:53,119 --> 01:28:55,588

Honestly, Amelia...

1165

01:28:57,082 --> 01:28:58,350

it might.

1166

01:29:05,048 --> 01:29:08,059

TARS, chart a course for Dr. Mann's.

1167

01:29:24,851 --> 01:29:28,121

TOM: We'll lose about a third again.

But next year...

1168

01:29:30,115 --> 01:29:33,051

Next year I'm gonna work Nelson's farm
and we'll make it up.

1169

01:29:33,785 --> 01:29:35,920

What happened to Nelson?

1170

01:29:41,543 --> 01:29:43,820

LOIS: Murph, have you eaten enough?

Would you like some more souffle?

1171

01:29:43,920 --> 01:29:47,599

Oh, no. I'm full, thanks.

It was delicious.

1172

01:29:48,174 --> 01:29:50,476

Coop, finish your fritter, please.

1173

01:29:52,345 --> 01:29:56,124

Will you spend the night? Your room
is exactly as you left it. It's ready.

1174

01:29:56,224 --> 01:29:57,667

I need to get back.

1175

01:29:57,767 --> 01:29:59,578

LOIS: My sewing machine is in there,
but there's plenty...

1176

01:29:59,678 --> 01:30:02,071

I need to...

1177

01:30:04,649 --> 01:30:06,692

Too many memories.

1178

01:30:06,818 --> 01:30:09,713

We might have something for that.

Hey, Coop.

1179

01:30:14,326 --> 01:30:16,294

[COOP COUGHING]

1180

01:30:17,162 --> 01:30:18,555

The dust.

1181

01:30:20,957 --> 01:30:23,401

Lois, I have a friend who...

1182

01:30:23,801 --> 01:30:25,637

could look at his lungs.

1183

01:30:31,676 --> 01:30:33,728

[DISTANT RUMBLING]

1184

01:30:43,521 --> 01:30:46,258

- COOPER: Amelia, I'm sorry.

- You were just being objective.

1185

01:30:46,358 --> 01:30:49,886

Unless you're punishing me

for screwing up on Miller's planet.

1186

01:30:49,986 --> 01:30:52,538

No, this wasn't a personal decision.

1187

01:30:53,073 --> 01:30:57,185

If you're wrong, you will have
a very personal decision to make.

1188

01:30:57,285 --> 01:31:00,480

Your fuel calculations
are based on a return journey.

1189

01:31:00,580 --> 01:31:04,651

Strike out on Mann's planet, and we'll have
to decide whether to return home...

1190

01:31:04,751 --> 01:31:07,112

or push on to Edmunds' with Plan B.

1191

01:31:07,212 --> 01:31:11,116

Starting a colony could save us
from extinction.

1192

01:31:11,216 --> 01:31:14,452

You might have to decide
between seeing your children again...

1193

01:31:14,552 --> 01:31:16,488

and the future of the human race.

1194

01:31:17,689 --> 01:31:19,699

I trust you'll be as objective then.

1195

01:31:26,481 --> 01:31:28,466

He's been asking for you
since he came to.

1196

01:31:28,566 --> 01:31:30,293

We were trying to reach you.

1197

01:31:36,157 --> 01:31:37,500

Murph.

1198

01:31:38,201 --> 01:31:40,003

I'm here, professor.

1199

01:31:40,412 --> 01:31:42,781

I let you all down.

1200

01:31:43,081 --> 01:31:46,718

No, you got us so far. Real close.

1201

01:31:48,253 --> 01:31:50,113

I'll finish what you started.

1202

01:31:50,213 --> 01:31:52,724

Good, good Murph.

1203

01:31:54,718 --> 01:31:57,312

You had faith...

1204

01:31:58,221 --> 01:31:59,814

all those...

1205

01:32:00,473 --> 01:32:02,567

all those years.

1206

01:32:03,935 --> 01:32:05,253

I...

1207

01:32:05,353 --> 01:32:08,156

I asked you to have faith.

1208

01:32:09,607 --> 01:32:12,702

I wanted you to believe...

1209

01:32:13,903 --> 01:32:16,080

that your father...

1210

01:32:18,783 --> 01:32:20,685

would come back.

1211

01:32:20,785 --> 01:32:22,078

I do, professor.

1212

01:32:23,705 --> 01:32:27,959

- Forgive me, Murph.

- There's nothing to forgive.

1213

01:32:31,028 --> 01:32:34,390

I... I lied, Murph.

1214

01:32:36,468 --> 01:32:38,561

I lied to you.

1215

01:32:44,601 --> 01:32:47,912

There was no need for him to...

1216

01:32:49,022 --> 01:32:51,199

To come back.

1217

01:32:53,485 --> 01:32:57,121

There is no way to help us.

1218

01:32:58,114 --> 01:32:59,457

But Plan A...

1219

01:32:59,699 --> 01:33:03,127

All this. All these people.

1220

01:33:03,953 --> 01:33:06,048

And the equation.

1221

01:33:09,751 --> 01:33:11,603

Did my father know?

1222

01:33:15,298 --> 01:33:17,508

Did he leave me?

1223

01:33:20,970 --> 01:33:22,313

Do...

1224

01:33:23,181 --> 01:33:24,816

not...

1225

01:33:25,475 --> 01:33:27,026

go...

1226

01:33:27,936 --> 01:33:30,021

gentle...

1227

01:33:31,523 --> 01:33:32,990

No.

1228

01:33:34,359 --> 01:33:35,943

No!

1229

01:33:36,653 --> 01:33:38,596

You can't leave.

1230

01:33:38,696 --> 01:33:40,248

You... No.

1231

01:33:41,032 --> 01:33:46,003

MURPH: Dr. Brand, I'm sorry to tell you
that your father died today. He had no pain.

1232

01:33:46,187 --> 01:33:48,356

He was at peace.

1233

01:33:48,623 --> 01:33:51,008

I'm very sorry for your loss.

1234

01:34:03,304 --> 01:34:05,073

Brand, did you know?

1235

01:34:07,392 --> 01:34:09,360

He told you, right?

1236

01:34:11,938 --> 01:34:13,814

You knew.

1237

01:34:15,233 --> 01:34:17,326

This was all a sham.

1238

01:34:21,406 --> 01:34:23,591

You left us here.

1239

01:34:25,243 --> 01:34:27,044

To suffocate.

1240

01:34:28,913 --> 01:34:30,548

To starve.

1241

01:34:54,606 --> 01:34:56,574

[ALARM BEEPING]

1242

01:34:57,609 --> 01:34:59,043

COOPER: Frozen cloud.

1243

01:37:12,869 --> 01:37:14,837

[GASPING]

1244

01:37:19,917 --> 01:37:22,136

[CRYING]

1245

01:37:23,379 --> 01:37:26,641

[SOFTLY] It's okay. It's okay.

1246

01:37:33,181 --> 01:37:34,982

It's okay.

1247

01:37:40,104 --> 01:37:42,406

Pray you never learn...

1248

01:37:43,274 --> 01:37:46,911

just how good it can be

to see another face.

1249

01:37:55,036 --> 01:37:57,605

I hadn't a lot of hope
to begin with, but...

1250

01:37:57,705 --> 01:38:00,341

after so long, I had none.

1251

01:38:01,509 --> 01:38:04,845

My supplies were completely exhausted.

1252

01:38:06,506 --> 01:38:10,559

The last time I went to sleep,
I didn't even set a waking date.

1253

01:38:13,971 --> 01:38:16,857

You have literally raised me
from the dead.

1254

01:38:17,600 --> 01:38:19,850

- Lazarus.

- Hm.

1255

01:38:20,686 --> 01:38:24,240

- What about the others?

- I'm afraid you're it, sir.

1256

01:38:24,649 --> 01:38:27,368

So far, surely.

1257

01:38:27,819 --> 01:38:32,757

No, our present situation is that there's
very little chance of rescuing any others.

1258

01:38:36,411 --> 01:38:38,921

AMELIA: Dr. Mann. Dr. Mann?

1259

01:38:39,497 --> 01:38:41,390

Tell us about your world.

1260

01:38:44,669 --> 01:38:46,612

Our world, we hope.

1261

01:38:46,712 --> 01:38:48,347

[SNIFFLES]

1262

01:38:50,341 --> 01:38:52,744

Our world, uh... is cold...

1263

01:38:52,844 --> 01:38:54,637

stark...

1264

01:38:56,013 --> 01:38:58,149

but undeniably beautiful.

1265

01:39:00,101 --> 01:39:03,654

MANN: The days are 67 hours long, cold.

1266

01:39:07,558 --> 01:39:09,177

The nights are...

1267

01:39:09,277 --> 01:39:12,112

67 far colder hours.

1268

01:39:17,452 --> 01:39:21,856

The gravity is a very, very pleasant

80 percent of the Earth's.

1269

01:39:21,956 --> 01:39:25,193

Now, up here where I landed,
the water is alkali...

1270

01:39:25,293 --> 01:39:29,113

and the air has too much ammonia to breathe
for more than just a few minutes...

1271

01:39:29,213 --> 01:39:33,868

but down at the surface,
and there is a surface...

1272

01:39:33,968 --> 01:39:35,660

the chlorine dissipates.

1273

01:39:35,761 --> 01:39:39,874

The ammonia gives way to crystalline
hydrocarbons and breathable air.

1274

01:39:39,974 --> 01:39:44,245

To organics. Possibly even to life.

1275

01:39:44,979 --> 01:39:47,198

We might be sharing this world.

1276

01:39:47,440 --> 01:39:49,267

These readings are from the surface?

1277

01:39:49,367 --> 01:39:52,970

Over the years,

I've dropped various probes.

1278

01:39:53,070 --> 01:39:56,557

- COOPER: How far have you explored?

- I've mounted several major expeditions.

1279

01:39:56,657 --> 01:40:00,778

But with oxygen in limited supply,

KIPP there really did most of the legwork.

1280

01:40:00,878 --> 01:40:03,606

- TARS: What went wrong with him, sir?

- MANN: Degeneration.

1281

01:40:03,706 --> 01:40:07,360

He misidentified the first organics
we found as ammonia crystals.

1282

01:40:07,460 --> 01:40:11,656

We struggled on for a time,
but ultimately I decommissioned him and...

1283

01:40:11,756 --> 01:40:13,991

used his power source
to keep the mission going.

1284

01:40:14,091 --> 01:40:17,161

I thought I was alone
before I shut him down.

1285

01:40:17,261 --> 01:40:19,230

Would you like me to look at him?

1286

01:40:19,430 --> 01:40:21,666

No. No. He needs a human touch.

1287

01:40:21,766 --> 01:40:26,337

Dr. Brand, CASE is relaying a message
for you from the comm station.

1288

01:40:26,437 --> 01:40:29,198

Okay. Be right there. Excuse me.

1289

01:40:40,910 --> 01:40:43,596

Dr. Brand, I'm sorry to tell you
that your father died today.

1290

01:40:44,205 --> 01:40:46,331

He had no pain.

1291

01:40:48,960 --> 01:40:50,761

He was at peace.

1292

01:40:52,547 --> 01:40:54,682

I'm sorry for your loss.

1293

01:40:56,759 --> 01:40:58,102

AMELIA: Is that Murph?

1294

01:40:58,511 --> 01:41:01,038

She's... She's grown.

1295

01:41:01,138 --> 01:41:03,223

Brand, did you know?

1296

01:41:03,891 --> 01:41:06,060

He told you, right?

1297

01:41:08,604 --> 01:41:10,197

You knew.

1298

01:41:11,649 --> 01:41:13,250

This was all a sham.

1299

01:41:14,193 --> 01:41:16,361

You left us here.

1300

01:41:17,989 --> 01:41:19,790

To suffocate.

1301

01:41:21,576 --> 01:41:23,252

To starve.

1302

01:41:26,289 --> 01:41:28,073

Did my father know too?

1303

01:41:28,332 --> 01:41:30,217

[MURPH SNIFFLES]

1304

01:41:30,459 --> 01:41:32,219

Dad?

1305

01:41:33,671 --> 01:41:35,890

I just want to know...

1306

01:41:36,924 --> 01:41:39,126

if you left me here to die.

1307

01:41:41,512 --> 01:41:43,814

I just have to know.

1308

01:41:49,020 --> 01:41:50,738

Cooper, my...

1309

01:41:51,939 --> 01:41:54,133

My father dedicated...

1310

01:41:54,233 --> 01:41:59,738

his whole life to Plan A.

I have no idea what she's talking about.

1311

01:42:01,048 --> 01:42:02,616

MANN: I do.

1312

01:42:07,246 --> 01:42:10,215

He never even hoped

to get the people off the Earth?

1313

01:42:11,125 --> 01:42:12,635

No.

1314

01:42:16,380 --> 01:42:20,517

But he's been trying to solve

the gravity equation for 40 years.

1315

01:42:20,718 --> 01:42:24,438

Amelia, your father solved his equation
before I even left.

1316

01:42:24,722 --> 01:42:26,666

Then why wouldn't he use it?

1317

01:42:26,766 --> 01:42:30,795

The equation couldn't reconcile relativity
with quantum mechanics. You need more.

1318

01:42:30,895 --> 01:42:32,880

More? More what?

1319

01:42:32,980 --> 01:42:36,050

MANN: More data.

You need to see into a black hole.

1320

01:42:36,150 --> 01:42:38,302

The laws of nature prohibit
a naked singularity.

1321

01:42:38,402 --> 01:42:40,204

Romilly, is that true?

1322

01:42:41,197 --> 01:42:44,976

If a black hole is an oyster,
then the singularity's the pearl inside.

1323

01:42:45,076 --> 01:42:49,913

The gravity's so strong, it's always
hidden in darkness... behind the horizon.

1324

01:42:50,831 --> 01:42:52,984

That's why we call it a black hole.

1325

01:42:53,084 --> 01:42:56,804

Okay, but if we see
beyond the horizon...

1326

01:42:57,088 --> 01:42:58,656

We can't, Coop.

1327

01:42:58,756 --> 01:43:01,492

MANN: There are some things
that aren't meant to be known.

1328

01:43:01,592 --> 01:43:05,705

Your father had to find another way
to save the human race from extinction.

1329

01:43:05,805 --> 01:43:09,441

- Plan B. A colony.
- Why not tell people?

1330

01:43:10,726 --> 01:43:13,879

- Why keep building those stations?
- He knew how hard it would be...

1331

01:43:13,979 --> 01:43:18,175

to get people to work together to save
the species instead of themselves.

1332

01:43:18,475 --> 01:43:20,720

- Or their children.
- Bullshit.

1333

01:43:20,820 --> 01:43:23,681

MANN: You never would've come here

unless you believed you would save them.

1334

01:43:23,781 --> 01:43:26,659

Evolution has yet to transcend
that simple barrier.

1335

01:43:26,759 --> 01:43:30,651

We can care deeply,
selflessly about those we know,

1336

01:43:30,751 --> 01:43:33,357

but that empathy rarely extends
beyond our line of sight.

1337

01:43:33,457 --> 01:43:35,467

But the lie.

1338

01:43:38,462 --> 01:43:41,081

That monstrous lie?

1339

01:43:42,133 --> 01:43:45,352

Unforgivable. And he knew that.

1340

01:43:45,803 --> 01:43:50,207

He was prepared to destroy his own humanity
in order to save the species.

1341

01:43:50,307 --> 01:43:53,027

- He made an incredible sacrifice.
- No.

1342

01:43:54,145 --> 01:43:59,124

An incredible sacrifice is being made
by the people on Earth who are gonna die!

1343

01:43:59,483 --> 01:44:01,752

Because in his fucking arrogance...

1344

01:44:02,069 --> 01:44:04,255

he declared their case hopeless.

1345

01:44:04,822 --> 01:44:08,392

I'm sorry, Cooper...
their case is hopeless.

1346

01:44:08,492 --> 01:44:10,919

No. No.

1347

01:44:11,245 --> 01:44:12,847

We are the future.

1348

01:44:16,417 --> 01:44:18,635

Cooper, what can I do?

1349

01:44:21,547 --> 01:44:23,482

Let me go home.

1350

01:44:23,966 --> 01:44:25,985

MAN: You're absolutely positive?

1351

01:44:26,510 --> 01:44:29,113

His solution was correct.

He'd had it for years.

1352

01:44:29,680 --> 01:44:32,408

- It's worthless?

- It's half the answer.

1353

01:44:33,267 --> 01:44:36,370

Okay, how do you find the other half?

1354

01:44:36,854 --> 01:44:38,589

Out there? A black hole.

1355

01:44:38,689 --> 01:44:41,825

- But stuck down here on Earth?

- Yeah?

1356

01:44:42,860 --> 01:44:44,828

I'm not sure you can.

1357

01:44:46,447 --> 01:44:49,416

MAN: God, they just pack up and leave.

1358

01:44:50,534 --> 01:44:52,920

What are they hoping to find?

1359

01:44:53,204 --> 01:44:54,546

Survival.

1360

01:45:02,046 --> 01:45:03,430

Damn it.

1361

01:45:06,050 --> 01:45:09,945

Murph, don't...?

Don't people have a right to know?

1362

01:45:10,471 --> 01:45:14,625

Panic won't help. We just

have to keep working, same as ever.

1363

01:45:14,725 --> 01:45:18,129

But isn't that exactly what Professor Brand
was manipulating us to do?

1364

01:45:18,229 --> 01:45:21,582

Brand gave up on us.

I'm still trying to solve this.

1365

01:45:22,107 --> 01:45:23,692

So...

1366

01:45:24,610 --> 01:45:26,579

do you have an idea?

1367

01:45:26,987 --> 01:45:28,622

A feeling.

1368

01:45:31,742 --> 01:45:34,044

I told you about my ghost.

1369

01:45:35,746 --> 01:45:38,049

My dad thought I called it a ghost...

1370

01:45:38,149 --> 01:45:40,217

because I was scared of it.

1371

01:45:43,379 --> 01:45:45,712

But I was never scared of it.

1372

01:45:46,924 --> 01:45:49,893

I called it a ghost because it felt...

1373

01:45:52,012 --> 01:45:53,981

It felt like a person.

1374

01:45:56,225 --> 01:45:58,193

It was trying to tell me something.

1375

01:46:00,855 --> 01:46:03,958

If there's an answer here on Earth,
it's back there...

1376

01:46:04,316 --> 01:46:08,829

somehow, in that room.

So I have to find it.

1377

01:46:11,949 --> 01:46:14,001

We're running out of time.

1378

01:46:15,619 --> 01:46:17,688

CASE:

What about auxiliary oxygen scrubbers?

1379

01:46:17,788 --> 01:46:20,024

COOPER: No, they can stay.

I'll be sleeping anyway.

1380

01:46:20,124 --> 01:46:21,776

- Hey, Coop?

- Yeah?

1381

01:46:21,876 --> 01:46:23,944

I have a suggestion

for your return journey.

1382

01:46:24,044 --> 01:46:26,897

- Yeah, what's that?

- Have one last crack at the black hole.

1383

01:46:28,674 --> 01:46:30,126

I'm going home, Rom.

1384

01:46:30,226 --> 01:46:33,979

Yeah, I know.

This isn't going to cost you any time.

1385

01:46:34,430 --> 01:46:36,465

There's a chance for the people on Earth.

1386

01:46:37,016 --> 01:46:40,127

- Talk to me.

- Gargantua's an older spinning black hole.

1387

01:46:40,227 --> 01:46:44,173

- It's what we call a gentle singularity.

- Gentle?

1388

01:46:44,273 --> 01:46:47,802

They're hardly gentle.

But the tidal gravity is so quick that...

1389

01:46:47,902 --> 01:46:52,223

something crossing the horizon fast

might survive. A probe, say.

1390

01:46:52,323 --> 01:46:57,061

- What happens after it crosses?

- After the horizon is a complete mystery.

1391

01:46:57,161 --> 01:47:00,314

So, what's to say

there isn't some way that the probe...

1392

01:47:00,414 --> 01:47:03,400

can glimpse the singularity
and relay the quantum data?

1393

01:47:03,500 --> 01:47:06,821

If he's equipped to transmit
every form of energy that can pulse.

1394

01:47:06,921 --> 01:47:10,015

TARS: Just when did this probe
become a "he," professor?

1395

01:47:10,257 --> 01:47:12,309

TARS is the obvious candidate.

1396

01:47:12,843 --> 01:47:14,829

I've already told him what to look for.

1397

01:47:14,929 --> 01:47:17,706

I'd need the old optical transmitter
off KIPP, Cooper.

1398

01:47:17,806 --> 01:47:19,208

You'd do this for us?

1399

01:47:19,308 --> 01:47:23,529

Before you get all teary, remember that
as a robot I have to do anything you say.

1400

01:47:24,146 --> 01:47:27,616

- Your cue light's broken.

- I'm not joking.

1401

01:47:29,944 --> 01:47:33,264

I'm gonna need TARS to remove and adapt
some components from KIPP.

1402

01:47:33,364 --> 01:47:35,766

I don't want to disturb
his archival functions.

1403

01:47:35,866 --> 01:47:37,601

I'll supervise.

1404

01:47:37,701 --> 01:47:38,811

All right.

1405

01:47:38,911 --> 01:47:43,649

Dr. Mann, we need to find three secure sites.

One for Brand's lab, two for habitat.

1406

01:47:43,749 --> 01:47:46,277

Once those modules have landed,
you don't want to move them.

1407

01:47:46,377 --> 01:47:48,988

I can take you to the probe sites,
but I don't think...

1408

01:47:49,088 --> 01:47:51,866

these conditions are gonna hold.

I think we should wait.

1409

01:47:51,966 --> 01:47:54,869

COOPER: CASE is headed down
with the rest of the distillery equipment.

1410

01:47:54,969 --> 01:47:58,105

I'd really like to secure
those sites by nightfall.

1411

01:47:59,723 --> 01:48:03,110

Well, these squalls do usually blow over.

1412

01:48:03,227 --> 01:48:04,420

Okay, then.

1413

01:48:04,520 --> 01:48:06,797

- You'll need a long-range transmitter.
- Got it.

1414

01:48:06,897 --> 01:48:08,740

- Are you charged?
- Yeah.

1415

01:48:09,024 --> 01:48:10,367

Follow me.

1416

01:48:10,859 --> 01:48:14,505

- TARS, 72 hours, yeah?

- Roger that, Cooper.

1417

01:48:20,703 --> 01:48:24,047

MANN: Brand told me why you feel
you have to go back.

1418

01:48:25,482 --> 01:48:28,569

But I'd be remiss
if I didn't at least mention...

1419

01:48:28,669 --> 01:48:32,940

that a mission such as ours
could certainly use an extra engineer.

1420

01:48:34,675 --> 01:48:39,029

You better slow down, turbo.
Safety first, CASE, remember.

1421

01:48:39,555 --> 01:48:41,607

CASE: Safety first, Cooper.

1422

01:48:42,558 --> 01:48:45,636

COOPER: I have to tell you, Dr. Mann,

I'm honored to be a part of this.

1423

01:48:45,936 --> 01:48:51,242

But once we set up base camp and secure those modules, my work's done here.

1424

01:48:51,358 --> 01:48:52,693

I'm going home.

1425

01:48:54,153 --> 01:48:56,455

[SPEAKING INDISTINCTLY]

1426

01:49:00,701 --> 01:49:03,861

You have attachments.

But even without a family...

1427

01:49:03,961 --> 01:49:09,384

I can promise you that that yearning to be with other people is powerful.

1428

01:49:09,752 --> 01:49:13,388

That emotion is at the foundation...

1429

01:49:13,756 --> 01:49:16,900

of what makes us human.

It's not to be taken lightly.

1430

01:49:22,765 --> 01:49:24,649

[LOIS COUGHING]

1431

01:49:24,808 --> 01:49:27,494

- How long have you had that cough?

- A while.

1432

01:49:37,946 --> 01:49:40,165

COOP: Mom lets me play in here.

1433

01:49:41,584 --> 01:49:43,335

I don't touch your stuff.

1434

01:49:44,578 --> 01:49:46,546

[WHIRRING]

1435

01:50:14,024 --> 01:50:15,951

Just take this gently.

1436

01:50:20,781 --> 01:50:24,459

You know why we couldn't just send machines
on these missions, don't you, Cooper?

1437

01:50:24,785 --> 01:50:29,514

A machine doesn't improvise well
because you can't program a fear of death.

1438

01:50:30,290 --> 01:50:34,609

Our survival instinct is our single
greatest source of inspiration.

1439

01:50:34,723 --> 01:50:36,638

Take you, for example.

1440

01:50:37,047 --> 01:50:38,682

A father...

1441

01:50:38,882 --> 01:50:42,185

with a survival instinct
that extends to your kids.

1442

01:50:43,053 --> 01:50:48,024

What does research tell us is the last thing
you're going to see before you die?

1443

01:50:49,434 --> 01:50:52,129

Your children. Their faces.

1444

01:50:52,229 --> 01:50:56,992

At the moment of death, your mind's
gonna push a little bit harder to survive.

1445

01:50:57,401 --> 01:50:58,943

For them.

1446

01:50:59,319 --> 01:51:00,871

Deep breath.

1447

01:51:02,865 --> 01:51:06,810

Uh, hey. I bet you're Coop.

Why don't you have a seat here for me?

1448

01:51:06,910 --> 01:51:09,546

It's bad. They cannot stay here.

1449

01:51:09,955 --> 01:51:11,348

- Okay?

- Yeah.

1450

01:51:19,590 --> 01:51:21,116

ROMILLY: TARS, what's taking so long?

1451

01:51:21,216 --> 01:51:24,161

TARS: Professor, I am having trouble
completing the boot up.

1452

01:51:24,261 --> 01:51:26,004

I don't understand.

1453

01:51:31,059 --> 01:51:32,503

[COOPER EXHALES]

1454

01:51:32,603 --> 01:51:34,154

It's funny.

1455

01:51:35,939 --> 01:51:37,866

When I left Earth...

1456

01:51:38,567 --> 01:51:40,952

I thought I was prepared to die.

1457

01:51:42,696 --> 01:51:44,531

The truth is...

1458

01:51:46,241 --> 01:51:51,546

I never really considered the possibility
that my planet wasn't the one.

1459

01:51:53,957 --> 01:51:56,360

Nothing worked out the way
it was supposed to.

1460

01:51:56,460 --> 01:51:58,002

COOPER: Let's go.

1461

01:52:03,634 --> 01:52:05,393

[YELLS]

1462

01:52:05,969 --> 01:52:08,864

All right, buddy,

give me a big deep breath.

1463

01:52:13,560 --> 01:52:15,078

What is this?

1464

01:52:15,395 --> 01:52:19,466

- What are you doing?

- I'm sorry! I can't let you leave with that ship.

1465

01:52:19,566 --> 01:52:22,136

We're gonna need it

to complete the mission...

1466

01:52:22,236 --> 01:52:25,848

once the others realize

what this place isn't.

1467

01:52:25,948 --> 01:52:30,269

We cannot survive here.

I'm sorry! I'm sorry!

1468

01:52:30,369 --> 01:52:31,753

[MANN GRUNTING]

1469

01:52:34,873 --> 01:52:36,550

[MANN YELLS]

1470

01:52:39,962 --> 01:52:43,157

- MURPH: They can't stay here anymore.

- MAN: You have to leave right now.

1471

01:52:43,257 --> 01:52:46,869

Let me make something abundantly clear.

You have a responsibility...

1472

01:52:46,969 --> 01:52:50,230

- MAN: Oh! Jesus!

- TOM: Coop, get her stuff. She's going home.

1473

01:52:50,430 --> 01:52:52,416

Dad didn't raise you

to be this dumb, Tom!

1474

01:52:52,516 --> 01:52:56,703

Dad didn't raise me, Grandpa did.

And he's buried out back with Mom and Jesse.

1475

01:52:57,187 --> 01:53:00,156

[PANTING] You faked all the data?

1476

01:53:01,566 --> 01:53:02,951

MANN: Yeah.

1477

01:53:06,655 --> 01:53:08,432

There's no surface?

1478

01:53:08,532 --> 01:53:10,000

MANN: No.

1479

01:53:10,659 --> 01:53:12,728

I tried to do my duty, Cooper...

1480

01:53:12,828 --> 01:53:18,133

but I knew the day that I arrived here
that this place had nothing.

1481

01:53:18,458 --> 01:53:22,554

And I resisted

the temptation for years...

1482

01:53:22,879 --> 01:53:25,199

but I knew that...

1483

01:53:25,299 --> 01:53:28,327

if I just pressed that button, then...

1484

01:53:28,427 --> 01:53:30,529

somebody would come and save me.

1485

01:53:31,471 --> 01:53:33,073

You fucking coward.

1486

01:53:33,807 --> 01:53:34,950

Yes.

1487

01:53:40,272 --> 01:53:41,615

Yes.

1488

01:53:43,233 --> 01:53:44,576

Yes.

1489

01:53:45,527 --> 01:53:46,637

Yes.

1490

01:53:46,737 --> 01:53:48,538

[BOTH GRUNTING]

1491

01:53:58,081 --> 01:54:02,727

Listen, if you're not going to go,
let your family go. Just save your family.

1492

01:54:03,128 --> 01:54:07,574

And we go live underground with you?
Pray that Daddy comes to save us?

1493

01:54:07,674 --> 01:54:11,648

Dad's not coming back.
He never was coming back. It's up to me.

1494

01:54:11,748 --> 01:54:14,661

You're gonna save everybody?

Because Dad couldn't do it.

1495

01:54:14,761 --> 01:54:19,069

Dad didn't even try!

Dad just abandoned us!

1496

01:54:19,519 --> 01:54:21,613

He left us here to die.

1497

01:54:22,022 --> 01:54:23,790

Nobody's going with you.

1498

01:54:27,402 --> 01:54:30,413

You gonna wait for your next kid to die?

1499

01:54:33,116 --> 01:54:34,709

[SOFTLY] Get out.

1500

01:54:35,285 --> 01:54:36,920

And don't come back.

1501

01:54:41,500 --> 01:54:43,635

MURPH: You can keep my stuff.

1502

01:54:44,961 --> 01:54:47,013

[BOTH GRUNTING]

1503

01:54:54,262 --> 01:54:55,939

Stop it!

1504

01:54:58,642 --> 01:55:00,527

No. No!

1505

01:55:01,311 --> 01:55:04,489

Dr. Mann, there's a 50-50 chance
you're gonna kill yourself!

1506

01:55:05,023 --> 01:55:07,092

Those are the best odds
I've had in years.

1507

01:55:07,192 --> 01:55:09,661

[AIR WHOOSHING AND COOPER YELLING]

1508

01:55:27,462 --> 01:55:29,597

Don't judge me, Cooper.

1509

01:55:30,048 --> 01:55:34,386

You were never tested like I was.

Few men have been.

1510

01:55:42,727 --> 01:55:44,195

You tried your best, Murph.

1511

01:55:53,405 --> 01:55:55,703

- You're feeling it, aren't you?

- [COOPER COUGHING]

1512

01:55:56,450 --> 01:55:58,585

The survival instinct.

1513

01:55:59,202 --> 01:56:03,640

That's what drove me. It's what drives
all of us. And it's what's gonna save us.

1514

01:56:04,708 --> 01:56:08,344

Because I want to save all of us.

For you, Cooper.

1515

01:56:13,216 --> 01:56:16,995

I'm sorry, I can't watch you
go through this. I'm sorry.

1516

01:56:17,095 --> 01:56:20,064

I thought I could, but I can't.

1517

01:56:20,849 --> 01:56:23,210

I'm here. I'm here for you.

1518

01:56:23,310 --> 01:56:25,653

Just listen to my voice, Cooper.

1519

01:56:26,146 --> 01:56:27,981

I'm right here.

1520

01:56:29,316 --> 01:56:30,950

You're not alone.

1521

01:56:40,368 --> 01:56:42,070

Do you see your children?

1522

01:56:45,123 --> 01:56:46,758

It's okay.

1523

01:56:47,417 --> 01:56:49,469

They're right there with you.

1524

01:56:53,048 --> 01:56:55,934

Did Professor Brand tell you
that poem before you left?

1525

01:56:56,468 --> 01:56:58,269

Do you remember?

1526

01:57:00,347 --> 01:57:03,616

MANN [PANTING]:

Do not go gentle into that good night

1527

01:57:04,935 --> 01:57:09,781

Old age should burn and rave

At close of day

1528

01:57:11,066 --> 01:57:13,743

Rage, rage against
the dying of the light

1529

01:57:19,616 --> 01:57:21,543

[COMM CLICKS OFF]

1530

01:57:38,093 --> 01:57:39,828

Brand! Help!

1531

01:57:39,928 --> 01:57:42,188

- Help!

- Cooper?

1532

01:57:48,603 --> 01:57:50,088

AMELIA: CASE!

1533

01:57:50,188 --> 01:57:51,781

No air.

1534

01:57:52,315 --> 01:57:53,825

Ammonia.

1535

01:57:54,609 --> 01:57:57,179

Cooper. Cooper, we're coming! CASE!

1536

01:57:57,279 --> 01:57:59,264

- CASE: I have a fix.

- Go! Go, go, go!

1537

01:57:59,364 --> 01:58:01,749

CASE: And away!

1538

01:58:13,003 --> 01:58:15,280

Cooper, we're coming.

Hang in there. Don't talk.

1539

01:58:15,380 --> 01:58:17,974

Try to breathe as little as possible.

We're almost there.

1540

01:58:21,444 --> 01:58:27,066

TARS: There's a security lockout, sir.

It requires a person to access function.

1541

01:58:31,813 --> 01:58:33,615

It's all yours, sir.

1542

01:58:41,631 --> 01:58:43,391

AMELIA: Try not to breathe.

1543

01:58:43,992 --> 01:58:48,021

We're coming. We're coming right now.

CASE, come on! Come on!

1544

01:58:48,121 --> 01:58:51,132

We got to go faster, CASE!

Faster, faster, faster!

1545

01:58:55,337 --> 01:58:57,347

Hang in there. Come on.

1546

01:59:03,553 --> 01:59:07,148

I see him, I see him!

CASE, bank! Bank right!

1547

01:59:25,867 --> 01:59:28,970

Cooper! Cooper! I'm here!

1548

01:59:52,102 --> 01:59:54,304

This data makes no sense.

1549

02:00:02,529 --> 02:00:04,014

I'm sorry.

1550

02:00:04,114 --> 02:00:07,000

- What?

- Mann was lying!

1551

02:00:14,457 --> 02:00:16,551

Go. Go.

1552

02:00:17,335 --> 02:00:18,653

Romilly.

1553

02:00:18,753 --> 02:00:20,030

AMELIA: Romilly!

1554

02:00:20,130 --> 02:00:22,849

Romilly! Do you read me, Romilly?

1555

02:00:23,133 --> 02:00:25,235

TARS: Step back, professor! Step back!

1556

02:00:31,850 --> 02:00:32,959

[COMM CLICKS ON]

1557

02:00:33,059 --> 02:00:35,945

- COOPER: Romilly...

- AMELIA: Romilly, do you read me?

1558

02:00:38,648 --> 02:00:40,483

Keep watch!

1559

02:00:41,151 --> 02:00:42,377

Lois?

1560

02:00:42,777 --> 02:00:45,580

- COOPER: What happened to caution, CASE?

- Safety first, Cooper.

1561

02:00:46,656 --> 02:00:50,376

Romilly? Romilly, do you read me?

This is Brand.

1562

02:00:52,954 --> 02:00:54,064

AMELIA: Romilly?

1563

02:00:54,164 --> 02:00:57,050

CASE: Dr. Brand. Cooper.

There's been an explosion.

1564

02:00:57,375 --> 02:00:59,469

Dr. Mann's compound.

1565

02:01:13,183 --> 02:01:15,610

[WHIRRING]

1566

02:01:26,780 --> 02:01:29,123

TARS, TARS, 10 o'clock!

1567

02:01:35,205 --> 02:01:37,465

COOPER: Let me know when TARS is aboard.

1568

02:01:40,794 --> 02:01:42,970

TARS: Romilly did not survive.

1569

02:01:43,880 --> 02:01:45,615

I could not save him.

1570

02:01:45,715 --> 02:01:47,242

- CASE: TARS is in.

- I'll take her now.

1571

02:01:47,342 --> 02:01:50,286

- Do we have a fix on the Ranger?

- CASE: He's pushing into orbit!

1572

02:01:50,386 --> 02:01:53,689

If he takes control

of that ship, we're dead.

1573

02:01:54,599 --> 02:01:57,860

- He'd maroon us?

- He is marooning us.

1574

02:01:59,562 --> 02:02:02,365

I'll meet you guys downstairs.

Go wait by the car.

1575

02:02:09,906 --> 02:02:14,418

Come on! Give me your bag.

Get in the backseat. Get in the backseat now!

1576

02:02:19,749 --> 02:02:21,968

COOPER: Dr. Mann, please respond.

1577

02:02:22,293 --> 02:02:24,446

Dr. Mann, please respond!

1578

02:02:24,746 --> 02:02:26,823

CASE: He doesn't know

the Endurance docking procedure.

1579

02:02:26,923 --> 02:02:29,725

- The autopilot does.

- CASE: Not since TARS disabled it.

1580

02:02:30,635 --> 02:02:31,745

Nice.

1581

02:02:31,845 --> 02:02:35,064

- What's your trust setting, TARS?

- Lower than yours apparently.

1582

02:02:38,393 --> 02:02:42,005

COOPER: Do not attempt docking.

I repeat, do not attempt docking.

1583

02:02:42,105 --> 02:02:43,214

Please res...

1584

02:02:43,314 --> 02:02:44,866

[COMM CLICKS OFF]

1585

02:03:42,582 --> 02:03:45,026

COMPUTER:

Auto-docking sequence withheld.

1586

02:03:45,126 --> 02:03:48,095

- Override.

- Unauthorized.

1587

02:03:48,504 --> 02:03:50,139

Override.

1588

02:03:50,340 --> 02:03:52,516

Unauthorized.

1589

02:03:56,346 --> 02:04:00,575

Do not attempt docking. I repeat,
do not attempt docking. Please resp...

1590

02:04:05,647 --> 02:04:07,740

[GRUNTING]

1591

02:04:44,268 --> 02:04:46,537

Moving slowly toward the Endurance.

1592

02:05:05,540 --> 02:05:07,341

[ALARM BEEPING]

1593

02:05:10,962 --> 02:05:12,614

COMPUTER: Imperfect contact.

1594

02:05:12,714 --> 02:05:15,057

- Override.

- Hatch lockout.

1595

02:05:22,557 --> 02:05:25,401

- Is he locked on yet?

- CASE: Imperfectly.

1596

02:05:26,936 --> 02:05:28,254

Dr. Mann, do not...

1597

02:05:28,354 --> 02:05:30,281

[ALARM BEEPING]

1598

02:05:40,241 --> 02:05:41,792

[ALARM STOPS]

1599

02:05:49,667 --> 02:05:52,970

COMPUTER: Hatch lockout disengaged.

1600

02:06:01,220 --> 02:06:04,958

Dr. Mann, do not,

I repeat, do not open the hatch.

1601

02:06:05,058 --> 02:06:07,001

I repeat, do not open the hatch.

1602

02:06:07,101 --> 02:06:10,237

If you open the hatch,

the airlock will depressurize.

1603

02:06:20,740 --> 02:06:22,666

[ALARM BEEPING]

1604

02:06:35,838 --> 02:06:38,432

- What happens if he blows the airlock?

- CASE: Nothing good.

1605

02:06:44,013 --> 02:06:46,708

Okay, pull back. Retro thrusters,

everything we've got, CASE!

1606

02:06:46,808 --> 02:06:48,584

- CASE: Thrusters are full!

- Back!

1607

02:06:48,684 --> 02:06:50,753

Relay my transmission

to the onboard computer...

1608

02:06:50,853 --> 02:06:53,006

and have it rebroadcast

as emergency P.A.

1609

02:06:53,106 --> 02:06:54,448

Dr. Mann...

1610

02:06:56,734 --> 02:06:59,679

AMELIA: I repeat, do not open

the inner hatch. I repeat...

1611

02:06:59,779 --> 02:07:01,122

Brand?

1612

02:07:01,656 --> 02:07:03,766

I don't know what he said to you...

1613

02:07:03,866 --> 02:07:06,836

but I am taking command
of the Endurance.

1614

02:07:06,994 --> 02:07:09,338

And then we can talk
about completing the mission.

1615

02:07:12,500 --> 02:07:14,310

Dr. Mann, listen to me.

1616

02:07:15,002 --> 02:07:17,304

This is not about my life.

1617

02:07:17,630 --> 02:07:21,183

Or Cooper's life.

This is about all mankind.

1618

02:07:21,467 --> 02:07:23,085

There is a moment...

1619

02:07:29,225 --> 02:07:30,660

It is not sa...

1620

02:07:38,860 --> 02:07:40,002

Oh, my God.

1621

02:07:45,616 --> 02:07:47,460

[CONTROLS CLICKING]

1622

02:07:58,212 --> 02:08:02,475

- CASE: There's no point using fuel to chase...

- Analyze the Endurance's spin.

1623

02:08:07,430 --> 02:08:09,940

- Cooper, what are you doing?

- Docking.

1624

02:08:14,228 --> 02:08:17,131

CASE: Endurance rotation is 67, 68 RPM.

1625

02:08:17,231 --> 02:08:19,759

Okay, get ready to match our spin

with the retro thrusters.

1626

02:08:19,859 --> 02:08:23,379

- CASE: It's not possible.

- COOPER: No... it's necessary.

1627

02:08:34,916 --> 02:08:37,384

CASE: Endurance is hitting stratosphere!

1628

02:08:41,130 --> 02:08:43,474

AMELIA: She's got no heat shield.

1629

02:08:46,302 --> 02:08:48,154

- CASE, you ready?

- Ready.

1630

02:08:56,479 --> 02:08:59,949

CASE:

Cooper! This is no time for caution.

1631

02:09:01,192 --> 02:09:03,719

CASE, if I black out,

you take the stick.

1632

02:09:03,819 --> 02:09:06,580

TARS, get ready to engage
the docking mechanism.

1633

02:09:13,329 --> 02:09:16,399

- CASE: Endurance is starting to heat.
- Twenty feet out.

1634

02:09:16,499 --> 02:09:19,068

TARS:
I need three degrees starboard, Cooper.

1635

02:09:19,168 --> 02:09:21,237

Ten feet out.

1636

02:09:21,337 --> 02:09:23,906

TARS: Cooper, we are lined up.

1637

02:09:24,006 --> 02:09:25,691

Initiating spin!

1638

02:09:41,023 --> 02:09:42,825

[GROANING]

1639

02:10:07,174 --> 02:10:08,484

Come on, TARS.

1640

02:10:16,642 --> 02:10:18,285

Come on, TARS!

1641

02:10:29,405 --> 02:10:32,124

- TARS: We are locked, Cooper.

- Locked. Easing up!

1642

02:10:39,707 --> 02:10:41,342

Easy.

1643

02:10:42,209 --> 02:10:43,844

Easy.

1644

02:10:49,383 --> 02:10:50,785

Retro thrusters!

1645

02:10:58,851 --> 02:11:00,653

Main engines on.

1646

02:11:06,108 --> 02:11:09,019

Pushing out of orbit. Come on, baby.

1647

02:11:16,827 --> 02:11:18,796

Killing main engines!

1648

02:11:19,747 --> 02:11:21,715

Okay, we're out of orbit.

1649

02:11:27,421 --> 02:11:28,656

[LAUGHING]

1650

02:11:28,756 --> 02:11:31,834

Okay. And for our next trick!

1651

02:11:33,469 --> 02:11:37,606

CASE: It'll have to be good.

We're heading into Gargantua's pull.

1652

02:11:38,224 --> 02:11:39,366

COOPER: Oh, shit.

1653

02:11:39,767 --> 02:11:41,660

- CASE, take the stick.

- Roger that.

1654

02:11:42,812 --> 02:11:44,655

[PANTING]

1655

02:12:02,665 --> 02:12:04,299

[GRUNTING]

1656

02:12:10,339 --> 02:12:12,182

[PANTING]

1657

02:12:18,180 --> 02:12:19,898

[ALARMS WAILING]

1658

02:12:31,527 --> 02:12:33,963

CASE:

Cooper, we're slipping towards Gargantua.

1659

02:12:35,197 --> 02:12:37,224

Shall I use main engines?

1660

02:12:37,324 --> 02:12:41,503

No. We got to let her slide

as far as we can.

1661

02:12:50,004 --> 02:12:52,948

- COOPER: Give it to me.

- TARS: There's good news, there's bad news.

1662

02:12:53,048 --> 02:12:56,777

Yeah, I've heard that one, TARS.

Give it to me straight.

1663

02:13:05,519 --> 02:13:08,798

The backup generator kicked in,

so the system's stable. They're all good.

1664

02:13:08,898 --> 02:13:10,240

Good.

1665

02:13:10,357 --> 02:13:13,761

Okay. The navigational hub
has been completely destroyed.

1666

02:13:13,861 --> 02:13:16,889

We don't have enough life support
to make it back to Earth, but...

1667

02:13:16,989 --> 02:13:19,141

I think we can scratch our way
to Edmunds' planet.

1668

02:13:19,241 --> 02:13:23,596

- What about fuel?

- Not enough. But I have a plan.

1669

02:13:24,121 --> 02:13:28,525

COOPER: We let Gargantua pull us down
close to her horizon.

1670

02:13:28,626 --> 02:13:31,946

Then a powered slingshot around,
launching us towards Edmunds' planet.

1671

02:13:32,046 --> 02:13:34,615

- AMELIA: Manually?

- That's what I'm here for.

1672

02:13:34,715 --> 02:13:37,293

I'm gonna take us

just inside the critical orbit.

1673

02:13:37,393 --> 02:13:40,162

- AMELIA: What about time slippage?

- Neither of us has time to worry...

1674

02:13:40,262 --> 02:13:42,232

about relativity right now, Dr. Brand.

1675

02:13:46,560 --> 02:13:48,162

I'm sorry, Cooper.

1676

02:13:51,190 --> 02:13:54,677

COOPER: Once we've gathered
enough speed around Gargantua...

1677

02:13:54,777 --> 02:13:56,912

we use Lander 1...

1678

02:13:57,112 --> 02:13:59,706

and Ranger 2 as rocket boosters to...

1679

02:14:00,274 --> 02:14:03,076

push us out of the black hole's gravity.

1680

02:14:04,912 --> 02:14:07,648

The Lender's linkages

have been destroyed...

1681

02:14:07,748 --> 02:14:10,384

so we'll have to control manually.

1682

02:14:11,293 --> 02:14:14,622

Once Lander 1 is spent,

TARS will detach...

1683

02:14:14,722 --> 02:14:16,832

TARS:

And get sucked into that black hole.

1684

02:14:17,258 --> 02:14:18,885

AMELIA: Why does TARS have to detach?

1685

02:14:18,985 --> 02:14:21,495

We have to shed the weight
to escape the gravity.

1686

02:14:21,595 --> 02:14:23,038

TARS: Newton's third law.

1687

02:14:23,138 --> 02:14:25,916

The only way humans have ever
figured out of getting somewhere...

1688

02:14:26,016 --> 02:14:27,626

is to leave something behind.

1689

02:14:27,726 --> 02:14:30,837

Cooper, you can't ask TARS
to do this for us.

1690

02:14:30,938 --> 02:14:34,842

He's a robot. So you don't have
to ask him to do anything.

1691

02:14:34,942 --> 02:14:38,662

- AMELIA: Cooper, you asshole!

- Sorry, you broke up a little bit there.

1692

02:14:38,862 --> 02:14:41,348

TARS: It's what we intended, Dr. Brand.

1693

02:14:41,448 --> 02:14:43,976

It's our only chance

to save people on Earth.

1694

02:14:44,076 --> 02:14:47,354

If I can find a way to transmit

the quantum data I'll find in there...

1695

02:14:47,454 --> 02:14:49,590

they might still make it.

1696

02:14:50,533 --> 02:14:53,460

Let's just hope

there's still someone there to save.

1697

02:15:01,510 --> 02:15:03,478

[HULL CREAKING]

1698

02:15:21,447 --> 02:15:23,415

CASE: Maximum velocity achieved.

1699

02:15:24,366 --> 02:15:26,936

Prepare to fire escape thrusters.

1700

02:15:27,336 --> 02:15:29,772

- Ready?

- Ready.

1701

02:15:29,872 --> 02:15:33,067

- TARS: Ready.

- CASE: Main engine ignition in three...

1702

02:15:33,167 --> 02:15:34,635

two...

1703

02:15:34,960 --> 02:15:36,895

one. Mark.

1704

02:15:50,225 --> 02:15:51,777

Come on, baby.

1705

02:15:52,645 --> 02:15:55,047

CASE: Lander 1 engines, on my mark.

1706

02:15:55,601 --> 02:15:57,800

Three, two...

1707

02:15:57,900 --> 02:15:59,701

one. Mark.

1708

02:16:04,740 --> 02:16:07,393

Ranger 2 engines, on my mark.

1709

02:16:07,493 --> 02:16:10,170

Three, two, one...

1710

02:16:10,412 --> 02:16:11,880

- Mark.

- Fire!

1711

02:16:21,715 --> 02:16:25,185

This little maneuver's

gonna cost us 51 years!

1712

02:16:25,761 --> 02:16:28,563

You don't sound so bad for pushing 120!

1713

02:16:33,852 --> 02:16:36,071

[BOTH WHOOP]

1714

02:16:38,440 --> 02:16:40,742

[ALARM BEEPING]

1715

02:16:43,654 --> 02:16:47,124

CASE:

Lander 1, prepare to detach on my mark.

1716

02:16:47,491 --> 02:16:50,193

Three, two...

1717

02:16:51,020 --> 02:16:54,056

- one. Mark.

- TARS: Detach!

1718

02:16:57,126 --> 02:16:59,695

- AMELIA: Goodbye, TARS.

- TARS: Goodbye, Dr. Brand.

1719

02:16:59,795 --> 02:17:02,898

- See you on the other side, Coop.

- See you there, Slick!

1720

02:17:05,634 --> 02:17:07,936

[ALARM BEEPING]

1721

02:17:11,306 --> 02:17:13,191

Okay, CASE.

1722

02:17:13,634 --> 02:17:17,612

- Nice reckless flying!

- CASE: Learned from the master.

1723

02:17:17,771 --> 02:17:20,424

- Ranger 2, prepare to detach.

- What?

1724

02:17:20,524 --> 02:17:23,744

No! No! Cooper! What are you doing?

1725

02:17:23,902 --> 02:17:27,681

Newton's third law.

You got to leave something behind.

1726

02:17:27,781 --> 02:17:30,267

You told me we had enough resources
for both of us.

1727

02:17:30,367 --> 02:17:32,394

COOPER: We agreed, Amelia...

1728

02:17:32,494 --> 02:17:34,254

90 percent.

1729

02:17:35,831 --> 02:17:37,215

Don't.

1730

02:17:39,126 --> 02:17:40,594

Detach.

1731

02:17:53,390 --> 02:17:56,543

COOPER: Okay, I am nosing down.

1732

02:17:59,938 --> 02:18:02,240

Approaching the event horizon.

1733

02:18:04,193 --> 02:18:08,997

Portside, dipping down beneath it
to go through it.

1734

02:18:10,282 --> 02:18:13,352

Heading towards blackness.

1735

02:18:13,452 --> 02:18:15,754

[STATIC] I have a visual of the event.

1736

02:18:15,954 --> 02:18:17,631

It's all black.

1737

02:18:19,658 --> 02:18:23,261

TARS, do you read me? It's all blackness.

1738

02:18:24,963 --> 02:18:27,765

TARS! Do you read me? Over.

1739

02:18:31,804 --> 02:18:33,271

Okay.

1740

02:18:34,181 --> 02:18:35,732

Screens...

1741

02:18:37,059 --> 02:18:38,860

getting interference.

1742

02:18:40,270 --> 02:18:43,156

Losing control of the stick.

I got flashes.

1743

02:18:43,440 --> 02:18:45,909

Flashes of lightness and blackness.

1744

02:18:46,819 --> 02:18:49,621

The turbulence in the gravity
is increasing.

1745

02:18:54,243 --> 02:18:55,794

Ah.

1746

02:18:55,994 --> 02:18:58,204

The computers are going down. Agh.

1747

02:18:58,997 --> 02:19:00,882

[ALARMS BEEPING]

1748

02:19:01,667 --> 02:19:03,635

[GRUNTING]

1749

02:19:09,925 --> 02:19:13,061

Gravitational pull.

I'm losing control of the stick.

1750

02:19:25,607 --> 02:19:27,826

[YELLING]

1751

02:19:46,128 --> 02:19:47,896

MAN: Murph? Murph, come on!

1752

02:19:53,468 --> 02:19:55,770

COMPUTER: Eject. Eject.

1753

02:19:56,972 --> 02:19:58,356

Eject.

1754

02:19:58,473 --> 02:19:59,941

Eject.

1755

02:20:00,183 --> 02:20:01,526

Eject.

1756

02:20:01,935 --> 02:20:03,320

Eject.

1757

02:20:05,063 --> 02:20:07,032

[GRUNTING]

1758

02:20:10,736 --> 02:20:12,871

[SHIVERING]

1759

02:20:38,597 --> 02:20:40,482

[GASPING]

1760

02:20:49,066 --> 02:20:50,951

[YELLING]

1761

02:20:56,990 --> 02:20:58,792

[GRUNTING]

1762

02:21:45,872 --> 02:21:47,882

[GRUNTING]

1763

02:21:55,215 --> 02:21:56,558

Murph.

1764

02:22:06,226 --> 02:22:08,495

Murph! Murph! Murph!

1765

02:22:16,778 --> 02:22:18,121

Murph.

1766

02:22:25,037 --> 02:22:27,022

No, no, no!

1767

02:22:27,122 --> 02:22:28,482

Murph!

1768

02:22:28,582 --> 02:22:31,393

Murph! No! No!

1769

02:22:41,636 --> 02:22:44,356

[YELLING]

1770

02:23:30,977 --> 02:23:33,038

If you're leaving, just go.

1771

02:23:33,438 --> 02:23:34,706

COOPER: No, no. No.

1772

02:23:36,191 --> 02:23:38,593

No, don't go. Don't go, you idiot.

1773

02:23:38,693 --> 02:23:40,286

Don't go!

1774

02:23:41,947 --> 02:23:43,915

Morse. Morse.

1775

02:23:44,366 --> 02:23:45,708

Morse.

1776

02:23:46,418 --> 02:23:48,478

Dot. Dot.

1777

02:23:48,578 --> 02:23:49,921

S.

1778

02:23:55,752 --> 02:23:57,095

T.

1779

02:24:01,383 --> 02:24:02,534

A.

1780

02:24:02,634 --> 02:24:03,918

Dash!

1781

02:24:06,513 --> 02:24:08,148

Dash! Dash!

1782

02:24:08,348 --> 02:24:09,458

MAN: Murph!

1783

02:24:09,558 --> 02:24:11,860

Murph, we don't have time for this!

Come on!

1784

02:24:11,977 --> 02:24:13,603

[PANTING] Y.

1785

02:24:18,600 --> 02:24:19,742

"Stay!"

1786

02:24:30,537 --> 02:24:33,173

Come on. Come on, Murph. Come on!

1787

02:24:33,540 --> 02:24:35,633

What's it say? What's it say, Murph?

1788

02:24:36,126 --> 02:24:37,710

What's it say?

1789

02:24:47,762 --> 02:24:49,189

"Stay."

1790

02:25:24,633 --> 02:25:27,769

Tell him, Murph. Make him stay.

1791

02:25:31,188 --> 02:25:32,774

Make him stay, Murph.

1792

02:25:41,483 --> 02:25:43,660

Make him stay, Murph.

1793

02:25:44,819 --> 02:25:47,247

Don't let me leave, Murph!

1794

02:25:50,158 --> 02:25:52,877

Don't let me leave, Murph!

1795

02:25:54,162 --> 02:25:56,172

[SOBBING]

1796

02:25:58,475 --> 02:26:01,310

No! No! No!

1797

02:26:21,698 --> 02:26:23,499

It was you.

1798

02:26:34,369 --> 02:26:36,713

You were my ghost.

1799

02:26:41,334 --> 02:26:43,428

[STATIC OVER COMM]

1800

02:26:46,131 --> 02:26:49,734

TARS: Cooper. Cooper. Come in, Cooper.

1801

02:26:50,927 --> 02:26:53,730

- TARS?

- Roger that.

1802

02:26:55,223 --> 02:26:58,151

- You survived.

- Somewhere...

1803

02:26:58,393 --> 02:27:00,503

in their fifth dimension.

1804

02:27:00,603 --> 02:27:03,006

They saved us.

1805

02:27:03,106 --> 02:27:08,386

Yeah? Who the hell is "they"?

And just why would they want to help us?

1806

02:27:08,486 --> 02:27:11,264

I don't know, but they constructed
this three-dimensional space...

1807

02:27:11,364 --> 02:27:14,726

inside their five-dimensional reality
to allow you to understand it.

1808

02:27:14,826 --> 02:27:16,853

Yeah, that ain't working.

1809

02:27:16,953 --> 02:27:18,563

Yes, it is.

1810

02:27:18,663 --> 02:27:22,609

You've seen that time is represented here
as a physical dimension.

1811

02:27:22,709 --> 02:27:25,845

You have worked out that you can exert
a force across space-time.

1812

02:27:26,212 --> 02:27:29,658

Gravity to send a message.

1813

02:27:29,958 --> 02:27:31,592

Affirmative.

1814

02:27:33,678 --> 02:27:35,304

Gravity...

1815

02:27:35,930 --> 02:27:39,501

can cross the dimensions, including time.

1816

02:27:39,601 --> 02:27:41,194

Apparently.

1817

02:27:44,773 --> 02:27:47,075

Do you have the quantum data?

1818

02:27:47,192 --> 02:27:49,118

Roger. I have it.

1819

02:27:49,778 --> 02:27:53,848

I am transmitting it on all wavelengths,
but nothing is getting out, Cooper.

1820

02:27:53,948 --> 02:27:56,501

I can do this. I can do this.

1821

02:27:56,659 --> 02:27:59,479

But such complicated data to a child?

1822

02:27:59,579 --> 02:28:00,772

Not just any child.

1823

02:28:00,872 --> 02:28:05,259

[SOFTLY] What else? Oh, come on, Dad.

1824

02:28:07,128 --> 02:28:09,364

Murph, the fire's out! Come on!

1825

02:28:09,464 --> 02:28:13,768

TARS: Even if you communicate it here,
she won't understand its significance for years.

1826

02:28:14,260 --> 02:28:15,787

I get that, TARS.

1827

02:28:15,887 --> 02:28:20,625

But we've got to figure something out

or the people on Earth are gonna die. Think!

1828

02:28:20,725 --> 02:28:22,377

Cooper...

1829

02:28:22,477 --> 02:28:25,279

they didn't bring us here

to change the past.

1830

02:28:28,566 --> 02:28:30,135

Say that again.

1831

02:28:30,235 --> 02:28:33,996

They didn't bring us here

to change the past.

1832

02:28:38,118 --> 02:28:40,378

No, they didn't bring us here at all.

1833

02:28:44,707 --> 02:28:46,876

We brought ourselves.

1834

02:28:55,635 --> 02:28:59,981

TARS, give me the coordinates
for NASA in binary.

1835

02:29:00,223 --> 02:29:02,984

In binary. Roger. Feeding data.

1836

02:29:27,000 --> 02:29:29,418

"It's not a ghost."

1837

02:29:30,670 --> 02:29:32,405

"It's gravity."

1838

02:29:32,505 --> 02:29:34,474

COOPER: Don't you get it yet, TARS?

1839

02:29:34,841 --> 02:29:36,934

I brought myself here!

1840

02:29:37,510 --> 02:29:41,314

We're here to communicate
with the three-dimensional world.

1841

02:29:41,431 --> 02:29:43,232

We're the bridge!

1842

02:29:50,940 --> 02:29:53,034

I thought they chose me.

1843

02:29:56,070 --> 02:30:00,041

- But they didn't choose me, they chose her.

- TARS: For what, Cooper?

1844

02:30:02,243 --> 02:30:04,212

To save the world.

1845

02:30:08,208 --> 02:30:12,821

All of this is one little girl's bedroom.

Every moment.

1846

02:30:12,921 --> 02:30:14,406

It's infinitely complex.

1847

02:30:14,506 --> 02:30:19,327

They have access to infinite time and space,

but they're not bound by anything!

1848

02:30:19,427 --> 02:30:24,398

They can't find a specific place in time.

They can't communicate.

1849

02:30:25,600 --> 02:30:28,670

That's why I'm here.

I'm gonna find a way to tell Murph...

1850

02:30:28,770 --> 02:30:30,338

just like I found this moment.

1851

02:30:30,438 --> 02:30:32,841

- How, Cooper?

- Love, TARS, love.

1852

02:30:32,941 --> 02:30:37,429

It's just like Brand said. My connection
with Murph, it is quantifiable. It's the key!

1853

02:30:37,529 --> 02:30:39,705

What are we here to do?

1854

02:30:40,323 --> 02:30:42,500

Find how to tell her.

1855

02:30:44,994 --> 02:30:46,629

The watch.

1856

02:30:49,457 --> 02:30:50,925

The watch.

1857

02:30:52,001 --> 02:30:53,427

That's it.

1858

02:30:55,630 --> 02:30:58,933

We code the data into the movement
of the second hand.

1859

02:31:02,262 --> 02:31:05,540

TARS, translate the data into Morse
and feed it to me.

1860

02:31:05,640 --> 02:31:10,236

Translating data to Morse.

Cooper, what if she never came back for it?

1861

02:31:11,604 --> 02:31:14,574

She will. She will.

1862

02:31:15,483 --> 02:31:17,410

MAN: Murph, I can see his car!

1863

02:31:18,319 --> 02:31:19,587

He's coming, Murph!

1864

02:31:21,322 --> 02:31:23,457

Okay. I'm coming down.

1865

02:31:24,617 --> 02:31:26,419

TARS: How do you know?

1866

02:31:29,330 --> 02:31:31,465

Because I gave it to her.

1867

02:31:36,546 --> 02:31:39,348

Roger. Morse is dot-dot-dash-dot.

1868

02:31:42,552 --> 02:31:43,979

Dot-dot...

1869

02:31:45,013 --> 02:31:46,981

dash-dot.

1870

02:31:47,140 --> 02:31:49,083

Dot-dash-dot-dot.

1871

02:31:49,183 --> 02:31:52,153

Dot-dash-dot-dot.

1872

02:31:52,353 --> 02:31:53,922

Dash-dash-dash.

1873

02:31:54,022 --> 02:31:56,574

Dash, dash, dash.

1874

02:32:14,542 --> 02:32:16,377

He came back!

1875

02:32:16,794 --> 02:32:21,265

It was him all the time!

I didn't know. It was him!

1876

02:32:22,050 --> 02:32:24,310

Dad's gonna save us.

1877

02:33:06,761 --> 02:33:08,112

Eureka!

1878

02:33:11,766 --> 02:33:13,401

It's traditional.

1879

02:33:15,853 --> 02:33:17,446

[MURPH LAUGHS]

1880

02:33:17,689 --> 02:33:19,615

Eureka!

1881

02:33:20,733 --> 02:33:22,618

[PANTING]

1882

02:33:24,028 --> 02:33:25,597

Did it work?

1883

02:33:25,697 --> 02:33:27,832

TARS: I think it might have.

1884

02:33:28,908 --> 02:33:30,268

How do you know?

1885

02:33:30,368 --> 02:33:34,046

Because the bulk beings
are closing the tesseract.

1886

02:33:37,583 --> 02:33:39,885

Don't you get it yet, TARS?

1887

02:33:40,753 --> 02:33:42,888

They're not "beings."

1888

02:33:43,256 --> 02:33:44,890

They're us.

1889

02:33:46,634 --> 02:33:50,062

What I've been doing for Murph,
they're doing for me.

1890

02:33:50,304 --> 02:33:51,873

For all of us.

1891

02:33:51,973 --> 02:33:54,292

Cooper, people couldn't build this.

1892

02:33:54,392 --> 02:33:57,045

No. No, not yet.

1893

02:33:57,145 --> 02:33:58,904

But one day.

1894

02:33:59,272 --> 02:34:02,783

Not you and me. But people.

1895

02:34:03,151 --> 02:34:07,496

A civilization that's evolved past

the four dimensions we know.

1896

02:34:13,786 --> 02:34:15,588

COOPER: What happens now?

1897

02:35:14,514 --> 02:35:16,524

[BIRDS CHIRPING]

1898

02:35:17,892 --> 02:35:19,652

MAN: Mr. Cooper.

1899

02:35:23,564 --> 02:35:25,574

All right. Let's take it slow, sir.

1900

02:35:25,691 --> 02:35:27,885

Nice and easy, Mr. Cooper.

1901

02:35:27,985 --> 02:35:33,332

Remember, you're no spring chicken anymore.

Actually, you are 124 years old.

1902

02:35:36,369 --> 02:35:38,337

[CHEERING OUTSIDE]

1903

02:35:40,039 --> 02:35:41,674

Take it slow, sir.

1904

02:35:42,291 --> 02:35:44,819

You were, uh... extremely lucky.

1905

02:35:44,919 --> 02:35:48,556

The Rangers found you with only minutes
left in your oxygen supply.

1906

02:35:56,681 --> 02:35:59,233

[GLASS SHATTERS AND KIDS CHEER]

1907

02:36:02,436 --> 02:36:04,071

Where am I?

1908

02:36:05,439 --> 02:36:07,283

Cooper Station.

1909

02:36:08,401 --> 02:36:10,244

Currently orbiting Saturn.

1910

02:36:11,946 --> 02:36:14,290

Cooper Station.

1911

02:36:16,450 --> 02:36:18,519

Nice of you to name it after me.

1912

02:36:18,619 --> 02:36:19,962

[LAUGHS]

1913

02:36:22,290 --> 02:36:23,441

What?

1914

02:36:23,541 --> 02:36:26,952

The station isn't named after you, sir.

It's, uh... named after your daughter.

1915

02:36:27,253 --> 02:36:30,323

Although she's always maintained
just how important you were.

1916

02:36:30,423 --> 02:36:32,433

Is she still alive?

1917

02:36:34,093 --> 02:36:36,271

She'll be here in a couple weeks.

1918

02:36:37,013 --> 02:36:39,540

She is far too old to be transferring
from another station...

1919

02:36:39,640 --> 02:36:42,318

but when she heard
that you'd been found...

1920

02:36:43,227 --> 02:36:46,038

well, this is, uh... Murphy Cooper
we're talking about.

1921

02:36:46,814 --> 02:36:48,616

Yes, it is.

1922

02:36:50,443 --> 02:36:53,245

We'll have you checked out of here

in a couple days.

1923

02:36:55,615 --> 02:36:58,417

I'm sure you'll be excited to see
what's in store.

1924

02:36:59,368 --> 02:37:03,564

I actually, uh... did a paper on you
in high school.

1925

02:37:03,664 --> 02:37:06,300

I know all about your life
back on Earth.

1926

02:37:07,668 --> 02:37:08,903

Oh, yeah.

1927

02:37:09,003 --> 02:37:10,554

Right.

1928

02:37:12,673 --> 02:37:18,312

If... If you'll follow me,
we've got a really good situation for you.

1929

02:37:21,349 --> 02:37:25,694

So, uh... when I made my suggestion
to Miss Cooper...

1930

02:37:26,312 --> 02:37:29,606

I was delighted to hear
that she thought it was perfect.

1931

02:37:32,485 --> 02:37:35,847

WOMAN 1 [ON TV]: It was just constant.
Just that steady blow of dirt.

1932

02:37:35,947 --> 02:37:38,933

Of course,
I didn't speak to her personally.

1933

02:37:39,033 --> 02:37:41,102

MAN 1:
We always set the plate upside-down.

1934

02:37:41,202 --> 02:37:44,021

Glasses or cups,

whatever it was, upside-down.

1935

02:37:44,121 --> 02:37:49,110

Well, my dad was a farmer.

Uh, like everybody else back then.

1936

02:37:49,210 --> 02:37:51,737

There just wasn't enough food.

1937

02:37:51,837 --> 02:37:54,615

WOMAN 2:

We wore little things, little strips...

1938

02:37:54,715 --> 02:37:59,954

of sheet over our nose and mouth
so we wouldn't breathe so much of it.

1939

02:38:00,054 --> 02:38:03,583

Well, it was pretty exciting for me
because it was hope.

1940

02:38:03,683 --> 02:38:07,962

MAN 2: I don't care who describes it, there is

no way for it to be exaggerated.

1941

02:38:08,062 --> 02:38:11,966

MAN: She did confirm

just how much you loved farming.

1942

02:38:12,066 --> 02:38:15,411

- Oh, she did, did she?

- Yeah. Come here.

1943

02:38:15,695 --> 02:38:20,725

Home sweet home.

Everything replaced and put back where it...

1944

02:38:20,825 --> 02:38:23,210

[INTERVIEWEES CONTINUE

SPEAKING IN BACKGROUND]

1945

02:38:27,039 --> 02:38:29,150

- Hey, is this...?

- Oh, yeah.

1946

02:38:29,250 --> 02:38:32,320

The machine we found out near Saturn
when we found you. Yes.

1947

02:38:32,420 --> 02:38:35,156

Its, uh... power source was shot,
but we could get you another one.

1948

02:38:35,256 --> 02:38:37,725

Yes. Please.

1949

02:38:38,634 --> 02:38:40,269

TARS: Settings.

1950

02:38:40,428 --> 02:38:42,229

General settings.

1951

02:38:42,430 --> 02:38:44,565

Security settings.

1952

02:38:46,976 --> 02:38:49,570

Honesty, new setting:

1953

02:38:50,438 --> 02:38:52,298

95 percent.

1954

02:38:52,398 --> 02:38:55,200

Confirmed. Additional customization?

1955

02:38:55,776 --> 02:38:57,202

Humor:

1956

02:38:58,404 --> 02:39:00,181

75 percent.

1957

02:39:00,281 --> 02:39:01,915

Confirmed.

1958

02:39:02,283 --> 02:39:05,478

Auto self-destruct T-minus 10, nine...

1959

02:39:05,578 --> 02:39:07,796

Let's make that 60 percent.

1960

02:39:09,790 --> 02:39:12,218

Sixty percent confirmed.

1961

02:39:12,543 --> 02:39:15,929

- Knock-knock.

- You want 55?

1962

02:39:20,509 --> 02:39:22,936

Is this really what it was like?

1963

02:39:24,847 --> 02:39:27,566

It was never this clean, Slick. Heh.

1964

02:39:31,771 --> 02:39:35,741

I don't care much for this pretending
we're back where we started.

1965

02:39:37,526 --> 02:39:40,120

I want to know where we are.

1966

02:39:41,447 --> 02:39:43,290

Where we're going.

1967

02:39:47,536 --> 02:39:50,690

- Mr. Cooper. The family's all in there.

- Yeah.

1968

02:39:50,790 --> 02:39:51,941

Family?

1969

02:39:52,041 --> 02:39:56,120

Yeah, they all came out to see her. She's
been in cryo-sleep for almost two years.

1970

02:40:12,478 --> 02:40:14,571

[FAMILY EXITS ROOM]

1971

02:40:28,994 --> 02:40:31,577

- You told them I like farming.

- [BOTH LAUGH]

1972

02:40:36,836 --> 02:40:39,004

It was me, Murph.

1973

02:40:40,965 --> 02:40:43,058

I was your ghost.

1974

02:40:44,051 --> 02:40:45,978

I know.

1975

02:40:47,471 --> 02:40:52,251

People didn't believe me.

They thought that I was doing it all myself.

1976

02:40:52,351 --> 02:40:53,694

But...

1977

02:40:56,272 --> 02:40:58,732

I knew who it was.

1978

02:41:03,195 --> 02:41:05,664

Nobody believed me.

1979

02:41:05,865 --> 02:41:08,484

But I knew you'd come back.

1980

02:41:10,870 --> 02:41:12,379

How?

1981

02:41:14,081 --> 02:41:17,509

Because my dad promised me.

1982

02:41:23,257 --> 02:41:25,559

Well, I'm here now, Murph.

1983

02:41:26,452 --> 02:41:28,387

I'm here.

1984

02:41:29,346 --> 02:41:30,881

No.

1985

02:41:32,766 --> 02:41:37,196

No parent should have to watch
their own child die.

1986

02:41:39,815 --> 02:41:42,984

I have my kids here for me now.

1987

02:41:44,979 --> 02:41:47,080

You go.

1988

02:41:49,700 --> 02:41:51,502

Where?

1989

02:41:54,705 --> 02:41:56,590

Brand.

1990

02:42:05,933 --> 02:42:08,260

MURPH: She's out there...

1991

02:42:13,783 --> 02:42:16,235

setting up camp.

1992

02:42:42,419 --> 02:42:44,429

Alone...

1993

02:42:45,297 --> 02:42:48,267

in a strange galaxy.

1994

02:42:58,852 --> 02:43:03,824

Maybe right now

she's settling in for the long nap...

1995

02:43:21,875 --> 02:43:25,012

by the light of our new sun...

1996

02:43:40,185 --> 02:43:42,529

in our new home.
